4. Description of the Proposed Development

Please describe the proposed development, including relevant information covering the design and external appearance, in particular the impact of the glare on occupiers of neighbouring land:

The development consists of the installation of 245kWp of Solar panels, located on existing roofs at the site . The vast majority of the electricity produced will be consumed on site.

The installation has been specifically designed to reduce any visual impact in the following ways:

1. The Panels are to be mounted on existing buildings.

2. The panels will be mounted flush to the roof and thus are considered to be unobtrusively located and are designed to have minimal visual impact on the surrounding area.

3. The panels are mounting leaving 1m gap around the perimeter of the roofline

4. The panels are designed with etched glass and various forms of technology to absorb the sunlight to maximise electricity production and thus minimise any glare. Please see attached module reflection document for further in formation.

Will the solar PV equipment be installed on:

A pitched roof ☒

How much will protrude beyond the plane of the roof? (Measured from the perpendicular with the external surface of the roof slope)

0.05

Metres

A flat roof ☐

What is the highest part of the solar PV equipment above the highest part of the roof? (excluding any chimney)

Metres

What are the measurements from the solar PV equipment to the external edge of the roof?

Between 1m & 1.5m

5. Checklist

Please read the following checklist to make sure you have sent all the information in support of your proposal.
