The Contractor is to check and verify in conjunction with the Architects details all setting out points, building and site dimensions, levels and sewer invert levels at connection points and ensure that they are fully conversant with the contents and requirements of the site investigation report and the Engineer's details and specifications and all relevant codes of practice, building legislation, British Standard Specifications, Building Regulations etc, whether or not specifically stated on this drawing.
This drawing is not intended to show details of ground conditions or ground contaminants. Earth area of ground raked upon to support any proposed or existing structures, roads or services shall be undertaken in accordance with the Engineer's details and specifications and in accord with the anticipated conditions as described in the site investigation report and is to be immediately notified to the Engineer, where applicable. Any suspect fluid ground or ground contaminants on or within the ground should be further investigated by a suitably expert person and the findings reported to the Engineer before any construction work commences. Where existing trees are shown to be retained they should be subject to a full Arboricultural inspection for safety. All trees are to be pruned so as to ensure they are a minimum of 3 metres from buildings and 2 metres from drainage and services, where applicable. A foundation is to be designed and constructed to suit the species and size of tree.
© This drawing and the building works depicted are the copyright of Banners Gate Ltd and may not be reproduced or amended except by written permission. No liability will be accepted for amendments made by other persons.

GENERAL NOTES

- This drawing is to be read in conjunction with relevant architectural and engineering drawings.
- Contractor to check all dimensions on site before commencing any work or shop drawings. All ground levels unless otherwise shown.
- Levels of the existing road at the point of tie-in with proposed site road must be checked prior to commencement of works.
- Any discrepancies between the details shown and actual on site conditions to be reported immediately to the engineer prior to commencement of works.
