

● THIS DRAWING IS NOT TO ANY GIVEN SCALE.

EXISTING REAR
ELEVATION

The drawing is a vertical architectural elevation of a building facade, divided into four distinct levels by horizontal lines. At the top, two chimneys are visible on either side of a central vertical axis. The levels are labeled on the right side with their respective elevations: Ridge Level (9.85m), Attic Storage Level (7.85m), Second Floor Level (5.34m), and Ground Floor Level (Datum 0.00m). The Attic Storage Level features horizontal siding and a small, square window with a triangular pattern. The Second Floor Level also has horizontal siding and a larger, rectangular window with a triangular pattern. The First Floor Level shows a large, rectangular window with a triangular pattern on the left and a smaller, square window with a triangular pattern on the right. The Ground Floor Level features a large, rectangular window with a triangular pattern on the left and a central entrance with a triangular pediment on the right. The drawing uses solid lines for structural elements and dashed lines for hidden or implied elements.
