

Technical Note - Unit 6 – 8 Drainage Specification

Reference: 079708-CUR-ZZ-XX-GN-C-00001-P01

Date: 7th February 2021

Summary:

The aim of this technical note is to summarise the drainage specification for Units 6-8 in accordance with the overall drainage strategy for the Earlsfield Park Development.

This technical note is to be read in conjunction with the below drawing.

079708-CUR-ZZ-XX-D-C-92003-P02_Unit 6-8 Drainage Plan

The Unit 6-8 Drainage Plan highlights the foul and surface water connections to be provided for by Marshalls CDP Ltd.

All surface water flows from the development are to discharge into the stub connections provided at a rate no greater than the maximum restricted rates highlighted.

All foul water flows from the development are to discharge into the stub connection provided. All foul flows are to be confirmed by others and to be assessed for capacity purposes.

The engineer is to be notified of any changes to the above drainage strategy. Any changes are to be reviewed and assessed by the engineer for suitability.
