Details of the pre-application advice received

A validation checklist was issued on the 20/05/21 which outlined information to be included as part of the planning application. Maxine relayed the conformation from the Lead Local Flood Authority that the site is not in an area of critical drainage problems as notified by the Environment Agency. Therefore the planning application does not require a Flood Risk Assessment. We were made aware that a surface water drainage plan would need to be submitted based on previous planning applications in the area. An Ecological Assessment was ruled out upon completion of the 'Wildlife Assessment Check' summary report. During the validation checklist process it was brought to our attention the site is in a high risk coal mining area. A coal mining risk assessment will be issued with the planning application.
