Design and Access Statement – Eaton Street Park, Prescott Prepared by RJG Architecture Ltd – 25th June 2026

Eaton Street Park is located within Prescott and is managed and maintained by Knowsley Council. The park has a number of facilities including:

- Toddler play space
- 8-13 play space
- Wildflower trail
- Picnic benches and seating
- Events Space
- Modern Pavilion Building

Located within the park is a bowling green which is rarely used alongside a bowling pavilion which was in a state of disrepair. In 2015, the Friends of Eaton Street Park community group secured funding to replace the bowling pavilion to enhance the facilities available to visitors to the park.

The Friends of Eaton Street Park is a volunteer led group which offers a variety of events within the park to support the community. They regularly hold tea in the park sessions, food clubs and clothing recycling events amongst other activities.

The proposed Big Top will be situated within the bowling green and will provide sheltered space for these events in addition to the bowling pavilion. A full specification has been provided alongside this application.

The location of the Big Top will be in the rear corner of the bowling green on a suitable flagged area to allow for disabled access. The proposed location is screened from view by mature trees and will have no detrimental visual impact on the park.
