

40 Chestnut Avenue, Huyton L36 5XR – Ref 23/02717/FUL

The fence is a total of 29.2m in length. The fence panels are 210cm in length and 153cm in height. Five of the panels have trellis added making them 210cm in length and 183cm in height. The retaining wall runs the length of the fencing and is 51cm in height.

The below pictures show the entire length of the fence as it is.

It was installed to create a safe and secure place for our children to play, as well as some privacy.

Both Oak Road and Chestnut Avenue are low traffic areas, only used to access the houses in the area, there is no through access to the main roads.

We consulted with our adjoining neighbours at the time of erection, they raised no issues at the time.
