Part Discharge of Conditions

Are you seeking to discharge only part of a condition?

☒ Yes

☐ No

If Yes, please indicate which part of the condition your application relates to

Items 1 - 3

1. A preliminary risk assessment which has identified: • all previous uses • potential contaminants associated with the site, including those from the previous uses. • a conceptual model of the site indicating sources, pathways and receptors. • potentially unacceptable risks arising from contamination at the site.
2. A site investigation scheme, based on (1) to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off-site.
3. The results of the site investigation and the detailed risk assessment referred to in (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

Discharge of Conditions

Please provide a full description and/or list of the materials/details that are being submitted for approval

Detailed Quantitative Risk Assessment - Review of site information in order to evaluate risks to human health and controlled waters and generate site-specific remedial target criteria for the site. Includes details of supplementary site investigation works to obtain information to inform the risk assessments.

Remediation Strategy and Verification Plan - Review of available information to develop a preliminary remediation strategy to address identified contamination. Provision of recommendations for remediation and validation works as required.
