The multi-fold wheelchair ramp folds in half length-wise and width-wise into a suitcase. This aluminium ramp has a black, non-slip surface and is available in lengths of 4 -10 ft. Designed to make it easier to move and assemble, the

6ft, 8ft and 10ft versions can be divided into channel ramps. Wheelchair ramps of this type may be used as a portable solution in the home or as a method for loading manual wheelchairs into vehicles. The non-slip surface also ensures a safe and secure journey when using the ramp.

The Ramp Factory have a wide range of channel ramps for manual wheelchairs such as the [economy channel ramps](#), the [telescopic channel ramps](#) if you require a wheelchair ramp with a length up to 12ft or, the [low profile channel ramp](#) which is suitable for mobility scooters. Alternatively, our [folding wheelchair ramps](#) provide portable access for manual and electric wheelchairs as well as mobility scooters.

[Folding Wheelchair Ramps FAQ's](#)

Description

- Folding ramp design for compact storage
- Grip tape running surface for extra grip even in wet
- Halves its length and its width
- 275kg capacity, Open Width 730mm, internal width 720mm
- From 6ft upwards the ramps split in 2, these are SPLIT ramps
- Rest on connection - to fit just rest on and start loading
- Maximum gradient = 1 in 6 although 1 in 8 is recommended
- Lightweight for easy handling
- Edges on each side of the ramp to prevent accidentally wheeling off
- The non-slip surface on all of our wheelchair ramps is glued onto the metal ramp. Therefore these ramps are not suitable to be kept outside and exposed to weather
- Black and yellow tape on the internal edge of the ramp to reduce trip hazards
- All pictures shown are for illustration purpose only. Actual product may vary due to product enhancement
- Curved for additional ground clearance
- Please note the 10ft ramp is quite heavy, please check it is suitable for your needs prior to ordering

- **These ramps are only suitable for use as mobility aids**
