Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

☐ Yes

☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Site area is currently residential and below 2000sqm. Land is predominantly hardstanding.

Note: Please read the help text for further information why developments may be exempt or not in scope.

- ☒ Yes
- ☐ No

Sharps Waste: Sharp tools that can cut or pierce the skin, including used needles, local anaesthetic cartridges, scalpel blades, single-use burs, and endodontic files.

Amalgam Waste: Toxic mercury-containing material from old fillings, excess mix, and extracted teeth that contain amalgam fillings.

Clinical waste is collected by third party contractor, in clinical waste bags. The bags are stored in a locked clinical waste bin,700 litre. Sharps are collected in a sharps bin from surgery. Amalgam/mercury waste is decreasing in volume with time - but are collected in designated containers by the same company. Company does provide clinical waste notes.
