REVISED CONSTRUCTION MANAGEMENT PLAN (VERSION 2)

Condition 3 Discharge Submission

Planning Permission: 20/00414/FUL
Condition Discharge Application: 20/00414/COND1 / 26/02593/PLANDI
Site: Liverpool Ganesh Temple, Delfby Crescent, Southdene, Kirkby, L32 8TN
Applicant: Mr Suresh Kumar Thangaraj
Site Manager: Mr Suresh Kumar Thangaraj

1. Introduction

This Construction Management Plan (Version 2) has been prepared in response to the Environmental Health consultation response dated 1 June 2026 and incorporates the requirements set out within Knowsley Council's Construction Good Practice Guidance (October 2024).

The purpose of this plan is to minimise the impact of construction activities upon neighbouring residents, visitors and the surrounding environment during the approved redevelopment works at Liverpool Ganesh Temple.

2. Site Management

The Site Manager shall be:

Mr Suresh Kumar Thangaraj

- The Site Manager will be responsible for:
- Day-to-day management of construction activities.
 - Monitoring compliance with this Construction Management Plan.
 - Managing contractor parking and deliveries.
 - Responding to complaints from neighbours.
 - Ensuring all environmental mitigation measures are implemented.
-

3. Construction Working Hours

Construction works shall only take place during the following hours:

Day	Working Hours
Monday – Friday	08:00 – 18:00
Saturday	08:00 – 13:00
Sundays	No Works
Public Holidays	No Works

All deliveries and collections shall be restricted to these hours unless otherwise agreed in writing with the Local Planning Authority.

4. Noise Control Measures

The following noise mitigation measures shall be implemented throughout the construction period:

- The quietest suitable plant and equipment will be selected.
- All machinery will be maintained in good working order.
- Equipment shall be switched off when not in use.
- Engine idling shall be avoided.
- Plant and equipment shall be positioned away from neighbouring residential properties wherever practicable.
- Temporary acoustic barriers will be used where necessary.
- Loading and unloading activities shall be undertaken carefully to minimise impact noise.
- Deliveries shall be restricted to approved working hours.
- Radios and amplified music shall not be used where they may cause disturbance.
- Any temporary generators shall be positioned away from neighbouring properties and fitted with suitable noise attenuation measures.

Where overnight power is required, hybrid generators will be used wherever practicable.

5. Piling and Vibration

No piling works are currently proposed as part of the approved development.

Should piling become necessary, details of:

- Piling methodology,
- Duration of works,
- Vibration monitoring arrangements,

shall be submitted to and approved by the Local Planning Authority prior to commencement of those works.

6. Reversing Alarms

Any site vehicles operating regularly within the site, including forklifts, telehandlers or similar plant, shall utilise broadband ("white noise") reversing alarms where reasonably practicable.

7. Dust and Air Quality Management

A permanent water supply shall be available throughout the construction period.

The following dust control measures shall be implemented:

- Water sprays shall be available on site at all times.
- Water suppression shall be used during dust-generating activities.
- Construction routes shall be kept clean and free from dust accumulation.
- Vehicle speeds shall be controlled within the site.
- Dust-generating materials shall be dampened during dry weather.
- Stockpiles shall be located away from neighbouring residential boundaries where practicable.
- Stockpiles shall be dampened when necessary.
- Cutting and grinding operations shall utilise water suppression systems.
- All wagon loads entering and leaving the site shall be covered.
- No burning of waste or materials shall take place on site.
- Static plant powered by internal combustion engines shall be positioned away from neighbouring properties wherever practicable.

8. Wheel Cleaning and Highway Cleanliness

Wheel cleaning facilities shall be available where required.

The following measures shall be implemented:

- Vehicles shall be inspected before leaving the site.
- Mud and debris shall not be permitted to enter the public highway.
- The site entrance and surrounding roads shall be monitored regularly.
- Any deposited debris shall be removed immediately.
- Road sweeping equipment shall be employed if required.

9. Construction Traffic and Deliveries

All construction vehicles shall enter and leave the site using the existing approved access from Clieves road.

Measures include:

- Deliveries scheduled in advance.
- Deliveries supervised by the Site Manager.
- Contractor parking restricted to designated on-site parking areas.
- No contractor parking on neighbouring residential streets.

- Deliveries unloaded within designated unloading areas.
-

10. Site Compound, Welfare Facilities and Storage Areas

A temporary construction compound shall be established within the site boundary.

The site layout plan submitted alongside this document identifies:

- Site welfare area.
- Site office.
- Material storage area.
- Skip and waste storage area.
- Delivery and unloading area.
- Contractor parking area.
- Wheel wash location.

All materials, equipment and waste shall remain within the site boundary.

11. Temporary Lighting

Any temporary site lighting shall:

- Be directed away from neighbouring residential properties.
 - Be positioned to minimise glare and light spill.
 - Only operate when necessary for safety and security purposes.
-

12. Neighbour Notification

Prior to commencement of construction works, neighbouring residents shall be notified by letter.

The letter shall include:

- Brief description of the works.
- Anticipated start date.
- Anticipated completion date.
- Site contact details.

Site Contact:

Telephone: __07812013198

13. Pest Control

Prior to commencement of construction works, a visual inspection of the site shall be undertaken to identify any evidence of pest activity.

Should evidence of pests be identified:

- Appropriate pest control measures shall be implemented.
- Professional pest control contractors shall be appointed where necessary.

Records shall be retained on site.

14. Complaints Procedure

Any complaints received from residents, visitors or businesses shall be:

- Recorded by the Site Manager.
 - Investigated promptly.
 - Appropriate corrective action implemented where necessary.
-

15. Compliance Statement

The development shall be carried out in accordance with this Revised Construction Management Plan (Version 2) throughout the construction period unless otherwise agreed in writing by Knowsley Metropolitan Borough Council.

Declaration

I confirm that the construction works will be undertaken in accordance with this Revised Construction Management Plan (Version 2) and all associated mitigation measures.
