1 INTRODUCTION

1.1 Project Background

1.1.1 This report sets out the updated heritage impact assessment for a reserved matters application for residential development of a Site at Lickers Lane, Halsnead, centred on NGR 346981, 390247.

1.1.2 Condition 29 of the outline planning permission states that: *'Any subsequent reserved matters application shall be accompanied by an updated Heritage Impact Assessment that considers the impact of the detailed proposals on the setting of the heritage assets within and adjacent to the site.'*

1.1.3 In accordance with the requirements of condition 29, this document provides an updated assessment of the impact of the detailed proposals upon the setting and significance heritage assets within the proximity of the Site, for which a detailed proposal plan has been created as part of a revised matters application.

1.1.4 This report should be read alongside the detailed plans and drawings prepared in respect to the detailed design and should be read in conjunction with the following documents:

- **Archaeological Desk Based Assessment:** L-P: Archaeology 2020, Halsnead Garden Village North, Knowsley.
- **Geophysical Survey:** Archaeological Survey West LLP 2018, Lickers Lane Geophysical Investigations.

1.1.5 Furthermore, reference should also be made to Chapter 6: Cultural Heritage within the 2020 Environmental Statement.

1.2 Proposed Development

1.2.1 The detailed proposed plan focuses on a large open arable field with a shallow ditch and bank at the west and north boundaries, a long wooded area to the north bounded by Lickers Lane, and an area of rough scrubland to the east which joins a larger scrub area.

1.2.2 The area is roughly L-shaped; main access will be provided from Lickers Lane. In total, 254 units of housing are proposed to be built within the site, comprising three apartment blocks, small terraces, and 2 to 3 storey semi-detached dwellings.

1.3 Data Baseline

1.3.1 The assessment was undertaken following the Standards and Guidance of the

Chartered Institute for Archaeologists (CIfA 2020) and in accordance with terminology expressed within the National Planning Policy Framework (2021). Historic England guidance good practice guidance presented in the Setting of Heritage Assets (Historic England GPA 3 2017) has been adhered to as appropriate.

1.3.2 In order to inform this assessment baseline data was obtained from the following:

- Merseyside Historic Environment Record (HER) consulted 31st July 2023;
- GIS datasets (Historic England 2023) and
- The National Heritage List for England (Historic England website).

2 LEGISLATION AND NATIONAL PLANNING POLICY AND GUIDANCE

2.1 Updated NPPF

- 2.1.1 The National Planning Policy Framework (NPPF) supported by the National Planning Policy Guidance (PPG), which endorses the conservation and enhancement of the historic environment (Department for Communities and Local Government 2014), was last updated in July 2021. The NPPF defines the role of the planning system as to promote and achieve sustainable development and involves *‘protecting and enhancing our natural, built and historic environment’* (MHCLG 2021, para:8). The historic environment is now being addressed under Chapter 16.
- 2.1.2 In ensuring the statutory duty of the Planning (Listed Building and Conservation Areas) Act, the NPPF requires that in determining applications *‘great weight’* should be given to the asset’s conservation and that *‘substantial harm to or loss of... grade II listed buildings, or grade II registered parks or gardens, should be exceptional’* whilst *‘substantial harm to or loss of...assets of the highest significance, notably Scheduled Monuments, protected wreck sites, registered battlefields, Grade I and II* listed buildings, Grade I and II* Registered Parks And Gardens, and World Heritage Sites, should be wholly exceptional’* (MHCLG 2021, para:200).
- 2.1.3 Non-statutory designated heritage assets, comprising Registered Parks and Gardens and Registered Battlefields, are protected under national and local planning policy only. This is also the case for the remainder of the archaeological resource; entries onto a historic environment record or sites and monument record as well as previously unknown features which may be recorded during the course of data collection in respect to a given development proposal.
- 2.1.4 The significance of a heritage asset (designated or non-designated) is defined within the National Planning Policy Framework (NPPF) as *‘the value of a heritage asset to this and future generations because of its heritage interest. This interest may be archaeological, architectural, artistic or historic’* (MHCLG 2021, Annex 2 page:71).
- 2.1.5 The setting of a heritage asset (designated or non-designated) is defined as *‘the surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral.’* (MHCLG 2021, Annex 2 page:71).
- 2.1.6 Where heritage assets (designated or non-designated) are to be affected by development, *‘local planning authorities should require an applicant to describe the*

significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets' importance and no more than is sufficient to understand the potential impact of the proposal on their significance' (MHCLG 2021, para:194).

2.1.7 Developments where substantial harm to or total loss of significance of a designated heritage asset should be assessed against specific tests and should deliver substantial public benefits which outweigh any loss or harm (MHCLG 2021, para:200 - 201). Less than substantial harm to a designated asset would require public benefits including the securement of an optimum viable use (MHCLG 2021, para:202).

2.1.8 Impacts to the significance of non-designated assets will require a balanced judgement based on the level of significance and the scale of harm (MHCLG 2021, para:203), although non-designated archaeological assets which are of equivalent significance to designated assets will be considered as such (MHCLG 2021, page:68). Where heritage assets of an archaeological nature may be impacted upon by development '*local planning authorities should require developers to submit an appropriate desk-based assessment and, where necessary, a field evaluation*' (MHCLG 2021, para:194).

2.2 Local Policy and Guidance

2.2.1 Relevant local planning policy is presented within the following documents:

- Knowsley Local Plan Core Strategy (2016); and
- Halsnead Garden Village Masterplan, Supplementary Planning Document (2017).

2.2.2 The following policies are applicable to the historic environment:

- Policy CS20- Managing the Borough's Historic Environment.
- Policy SUE2, Part h); and
- Policies HSPD1, 2, 3 and 8 of the Halsnead Garden Village Masterplan.

2.2.3 This report further takes into consideration the updated version of:

- ClfA (2020) Standards and Guidance for Historic Environment Desk-Based Assessment, Reading: Chartered Institute for Archaeologists.
- Historic England (2019) Statements of Heritage Significance: Analysing Significance in Heritage Assets.

3 BASELINE INFORMATION

3.1.1 Information on designated heritage assets was complimented by GIS information downloaded from Historic England (Historic England, 2023). All information on non-designated heritage assets was provided by the Merseyside Historic Environment Record, consulted in July 2023.

3.1.2 All heritage assets within a 1km search area are shown on Figure 1. Any new heritage assets now recorded within the 1km search area are also specified where relevant within the following text.

3.1.3 Within the 1km search area the following heritage assets are present (Appendix 1):

- 9 Grade II Listed Buildings;
- 2 Delisted Buildings; and
- 164 Non-designated Heritage Assets.

3.1.4 Of the 164 non-designated heritage asset, 113 were added to the HER after 2018. Five of these heritage assets are upstanding assets. No new designated heritage assets have been identified.

3.1.5 Based on the proposed detailed scheme, the previous assessment (L-P: Archaeology 2020) and the 2022 Planning Committee Report concerning the outline scheme, impacts to the significance of the following upstanding heritage assets, within proximity of the Site are being considered:

- *Gate Piers beside North-East Lodge to Halsnead Park:* Grade II Listed Building (NHLE 125429);
- *North-East Lodge to Halsnead Park:* Grade II Listed Building (NHLE 1253249);
- *Sandfield House:* Grade II Listed Building (NHLE 1253251);
- *Church of St Nicholas:* Grade II Listed Building (NHLE 1261894);
- *Old Halsnead:* Grade II Listed Building (NHLE 1261787);
- *Carr House Farmhouse:* Grade II Listed Building (NHLE 1253441);
- *The Paddock and the Stables:* Grade II Listed Building (NHLE 1253505);
- *Barn at Snape Gate:* Grade II Listed Building (NHLE 1253250);
- *Non-designated Barn at Fairchild's Farm (MME6859), 540m to the east of Site:* Probably C18. High building on roadside, of coursed stone rubble with irregular quoins and stone roof. Side facing road has centre cart entrance with catslide

roof on side walls which are canted out, and a segmental headed entrance with keystone.

- *Non-designated War Memorial (MME20860), 325m to the west of Site:* War memorial, St Nicholas churchyard, OS maps show a war memorial in the graveyard section to the north of the church from 1927.
- *Non-designated Halsnead Park Wall (MME15681), abutting the site:* The park is shown on early 19th century mapping and it is assumed that the wall dates from the creation of the park, in the late 18th or early 19th century.
- *Non-designated Halsnead Park (MME15147), including non-designated features of:*
 - Route of Main Drive;
 - Built remnants of the 'Princes House Farm' (former 'home farm' to the Halsnead Estate);
 - Site of Halsnead Hall;
 - Walled Garden and outbuilding;
 - Woodland clumps and belts;
 - Ponds and streams
 - Designed and dynamic views across the landscape formed by the open
 - landscape between routes, water features and tree clumps/belts, and;
 - Estate wall – discussed separately.

4 ASSESSMENT OF SIGNIFICANCE AND IMPACT ASSESSMENT

4.1.1 The significance of a heritage asset is defined within the National Planning Policy Framework (NPPF) as *'the value of a heritage asset to this and future generations because of its heritage interest. This interest may be archaeological, architectural, artistic or historic. Significance derives not only from a heritage asset's physical presence, but also from its setting.'* (MHCLG 2021, Annex 2 page:71).

4.1.2 The qualification of impacts has been informed by the methodology presented within Chapter 6 of the 2020 Environmental Statement, specifically Tables 6.1 to 6.4 however reference is also made to the relevant paragraphs of chapter 16 of the NPPF.

Old Halsnead, Grade II Listed Building (1261787)

4.1.3 The significance of Old Halsnead stems from its associated historic and architectural interest. It is located to the south of the Site beyond the M62 motorway which has dissected the Halsnead Park and which physically separated Old Halsnead from its historic parkland setting.

Special Interest

4.1.4 Old Halsnead is of historic interest as a building of late 17th century origins and is dated to 1680 within its listing description. A 2006 desk based assessment by Oxford Archaeology suggest an earlier date of 1637 making reference to an earlier date stone.

4.1.5 The building also holds interest in its association to Halsnead Park. This evidenced by the manorial crest within the gabled porch. The house was occupied by the Willis family in the 19th century and it has been speculated that if Thomas Willis was responsible for the building of the first house on the site of Halsnead Hall to the northwest, then the previous lords of the manor may have resided at Old Halsnead (Oxford Archaeology, 2006).

4.1.6 The architectural interest of the building is expressed by its external composition. It is of stuccoed stone construction with stone tile roof and centre and end rendered chimney stacks. Windows consist of five leaded lights with chamfered red sand stone mullions. To the centre of the main frontage is a two-storey gabled porch which has a decorative round arched red sandstone entrance with red sandstone keystone and imposts with a small three-light window set directly above. Above this a stone manorial crest.

Setting of the Asset

4.1.7 Historically, the building sat within the grounds of Halsnead park with one of the

driveways passing between the house and its outbuilding range on its route from Foxes Ban Lane to the east. This entrance was also defined by a lodge, since removed.

- 4.1.8 The House retains a semi-rural setting set within a large plot with woodland screening to the north which is shown as existing on historic mapping from the late 19th century and which offers some screening to the motorway to the north.
- 4.1.9 The setting of the asset is much altered and the building is physically detached from the former parkland such that it is no longer experienced as part of the historic parkland setting. This detachment and isolation from the parkland is further suggested through the loss of historic parkland features such as the former lodge at the driveway entrance to the asset from Fox's Bank Lane.
- 4.1.10 The driveway to the property remains as shown on historic mapping and a section of red stone walling which defined the perimeter of the park remains to the west side of Fox's Bank Lane.

Impact Assessment

- 4.1.11 The proposed development would introduce further change within the former Halsnead Park within which the asset formerly sat and was associated with. Previous extensive change within the park including loss of Halsnead Hall, the creation of caravan park and the insertion of the M62 motorway alongside the use of the land has eroded much of the historic landscape and the asset is no longer physically associated within the park being dissected by the motorway. As such it is considered that the asset does not derive significance from the land within the Site.
- 4.1.12 The proposals are located within the northern extent of the former parkland and would not be visible from the asset, its immediate setting nor on approach towards its driveway from Fox's Bank Lane. As such the current experience of the significance of the asset would not be altered.
- 4.1.13 It is concluded that the proposed detailed scheme would have no impact upon the significance of the asset.

Carr House Farmhouse, Grade II Listed Building (NHLE 1253441)

- 4.1.14 The significance of Carr House Farmhouse is derived from its historical, aesthetic and architectural interest. The contribution of setting to understanding this significance and appreciating the associated interests is described below.

Special Interest

- 4.1.15 The historic interest of the farmhouse stems from its retention of historic fabric,

especially the date stone of 1660. The farmhouse was set was set along the eastern boundary of Halsnead Park, within the nucleated settlement of Windy Harbour.

- 4.1.16 The buildings holds architectural interest as a well maintained 17th century structure, with two distinct phases of development: an earlier, light yellow sandstone structure and the larger, red-sandstone structure with the 1660 datestone.

Setting of the Asset

- 4.1.17 The significance which Carr House derives from its current setting has been undermined by 20th and 21st century suburban and industrial development to each side of Windy Arbor Road.
- 4.1.18 The earlier setting of the building is preserved by an area of woodland, however the historic access path to Halsnead Park has been removed. The area of woodland lies beyond the site and shields the property from any visual impact by the detailed development.

Impact Assessment

- 4.1.19 The heritage asset can be classed to be of medium significance, based on its retention of historic fabric and its setting as part of a historic farmstead adjacent to Halsnead Park. Having considered the nature and extent of the significance of the asset, including the contribution made by setting, it is concluded that there would be no harm arising from the proposed development. This would result in a **neutral** significance of impact.

The Paddock and the Stables, Grade II Listed Building (NHLE 1253505)

- 4.1.20 The significance of the Paddock and Stables is derived from its historical, aesthetic and architectural interest as part of Carr House Farmstead. The contribution of setting to understanding this significance and appreciating the associated interests is described below.

Special Interest

- 4.1.21 The historic interest of the Paddock and Stables is derived from their retention of historic fabric, with the buildings incorporating 16th and 17th century fabric, as well as displaying date stones from 1506, 1653, and 1819. The building was set was set along the eastern boundary of Halsnead Park, opposite Carr House Farmhouse, within the nucleated settlement of Windy Harbour. The numerous date stones give a clear evidence to the consistent use of the farm buildings from at least the late medieval period, and throughout the post-medieval periods.

- 4.1.22 The buildings holds architectural interest, comprising 3 elements of various phases of work: a low, single-storeyed room, probably a former byre, with a datestone of 1506; a formerly part-storeyed barn, extended in 1819 but preserving a datestone of 1653; and a single-storeyed room from the 1819 re-modelling.

Setting of the Asset

- 4.1.23 The Paddocks and Stables principally derives its setting significance from its association with Carr House Farmhouse. The wider setting has been undermined by 20th and 21st century suburban and industrial development each side of Windy Arbor Road.

- 4.1.24 The earlier setting of the building is preserved by an area of woodland, however the historic access path to Halsnead Park has been removed. The area of woodland lies beyond the site boundary and shields the property from any visual impact by the detailed development.

Impact Assessment

- 4.1.25 The heritage asset can be classed to be of medium significance, based on its retention of historic fabric of several phases of development and its setting as part of a historic farmstead adjacent to Halsnead Park. Having considered the nature and extent of the significance of the asset, including the contribution made by setting, it is concluded that there would be no harm arising from the proposed development. This would result in a **neutral** significance of impact.

Barn at Snape Gate: Grade II Listed Building (NHLE 1253250)

- 4.1.26 The significance of the Barn at Snape Gate is derived from its historic and architectural interest. The contribution of setting to understanding this significance and appreciating the associated interests is described below.

Special Interest

- 4.1.27 The special interest of the asset stems from its 18th century origins. The property, formerly a barn with a centre cart entrance, had been repurposed as residential property. The barn historically was set within Halsnead Park, along the eastern boundary of the park, along Fox's Bank Lane.

Setting of the Asset

- 4.1.28 The significance of the setting of the former barn is derived from its association with Snape Gate Cottages and Snape Gate, as park of Halsnead Park. A modern development, the Fox Wood Garden Village, is currently being built surrounding this

heritage asset to the north and west, thus significantly impacting the setting. The property of the barn is framed by woodland, forming some screening to the heritage asset.

Impact Assessment

- 4.1.29 The heritage asset can be classed to be of medium significance. Having considered the nature and extent of the significance of the asset, including the contribution made by setting, it is concluded that there would be no harm arising from the proposed development. This would result in a **neutral** significance of impact.

Church of St Nicholas, Grade II Listed Building (NHLE 1261894)

- 4.1.30 The significance of the asset is derived principally from its historical, artistic, communal and architectural interests. The contribution of setting to understanding this significance and appreciating the associated interests is described below.

Special Interest

- 4.1.31 The church holds historic interest through its association to the architect G E Street and to the Halsnead estate and through its origins in the mid-19th century being constructed between 1864-68. Daniel Willis of Halsnead Hall laid the foundation stone for the church, and the stone for the dressings was donated from his stone quarry.
- 4.1.32 The architectural interest stems the church being a landmark in the local area it is a reasonably imposing church set within a generously sized churchyard fronted by trees and a low but well detailed stone wall where the architectural form and detailing offer clear evidence as to its ecclesiastical function.

Setting of the Asset

- 4.1.33 The location of the church next to the Main Drive entrance to Halsnead Park, is of some significance, likely chosen to impart the site with an additional sense of importance.

Impact Assessment

- 4.1.34 The parcel of land to the east of Windy Arbour Road as previously included in the outline permission does not form part of this detailed design.
- 4.1.35 Impacts to the significance of the asset as result of the proposed scheme to the north of the outline application area would be less than those predicted as part of outline permission with the detailed proposals being located away from the asset.
- 4.1.36 In respect to the key features of special interest and the aspects of setting from which

the asset derives significance, it is concluded that the proposed detailed scheme would have no more than a minor impact upon the setting of the heritage asset, resulting in a **minor adverse** significance of impact. In consideration of the NPPF, impacts would equate to less than substantial harm to heritage significance.

Sandfield House, Grade II Listed Building (NHLE1253251)

- 4.1.37 The significance of the asset is derived principally from its historical and architectural interests. The contribution of setting to understanding this significance and appreciating the associated interests is described below.

Special Interest

- 4.1.38 The special interest of the asset stems from its 18th century origins. The property, formerly a house and now used as a children's day nursery, was formerly associated with Halsnead Park.

Setting of the Asset

- 4.1.39 The significance which Sandfield House derives from its current setting has been undermined by 20th century suburban development on the northern side of Lickers Lane and the creation of Fox's Bank cemetery to the east.
- 4.1.40 The earlier setting of the building is preserved to the south and west by an area of woodland which was probably designed as shelter-belt during the creation of Halsnead Park in the 18th century. This area of woodland lies beyond the site and will not be physically affected by the detailed development.

Impact Assessment

- 4.1.41 The detailed development within the application Site will introduce a further element of suburbanisation within the setting of Sandfield House. Mitigation in the form of retained woodland adjacent to the road frontage of Lickers Lane has been included and will preserve a sense of the former park setting enjoyed by the house.
- 4.1.42 The 2020 report concluded that that the outline scheme would have an impact of negligible adverse significance on Sandfield House. In view of the detailed scheme, it considered that impacts to the significance of the asset would remain as **negligible significance** in effect. In consideration of the NPPF, impacts would equate to less than substantial harm to heritage significance.

North East Lodge to Halsnead Park and Gate Piers, Grade II Listed Buildings (NHLE 1253249 and 1253429 respectively)

- 4.1.43 The significance of the assets is derived principally from their historical and

architectural interests. The contribution of setting to understanding their significance and appreciating the associated interests is described below.

Special Interest

- 4.1.44 The Lodge and gate piers are of special interest in their historic origins as part of the Halsnead Park estate. The structure have an inherent historic interest in their Georgian origin and in their association with the former estate where the lodge and gates collective marked the formal entrance into the park
- 4.1.45 The significance of the gates, gatepiers and railings arises from their historic and architectural interest as a formal entrance to the former Halsnead estate. The gate piers comprise four rusticated, stone piers with cornice and ball capping flanked by convex wall of rusticated stone of the same height.
- 4.1.46 The lodge is of red sandstone ashlar with pyramidal slate covered roof. It is of single storey in scale with a simple square plan which whilst extended remain legible. Embellishment included rusticated quoins, a round-headed central doorway with stone round-arched porch. The doorway is flanked by 2-light window with round-headed lights and labels.

Setting of the Assets

- 4.1.47 The lodge and the gates have a strong aesthetic and functional relationship with both intended to define one of the entrances into the former estate and providing a visual extension of Halsnead House and the family's wealth and status. This immediate setting and the intended visual relationship the lodge has with the former parkland contributes to its associated historic and architectural interests.
- 4.1.48 The setting of the lodge is linked closely to its historic function and use, controlling a formal entrance into Halsnead Park and remains a tangible reminder as to the former presence and status of the estate.

Impact Assessment

- 4.1.49 The significance which the lodge and gatepiers derive from their setting has been adversely affected by 20th century development of the Halsnead mobile home park and the construction of the M62 motorway.
- 4.1.50 These assets are located to the east of the Site boundary of the detailed scheme and would not be physically impacted by the proposals. However, the detailed scheme will introduce further elements of suburbanisation within the wider setting of the assets.
- 4.1.51 The 2020 report concluded that that the outline scheme would have an impact of

minor adverse significance on Lodge and gate piers. In view of the detailed scheme, it is considered that impacts to the significance of the assets would remain as **minor adverse** significance in effect. In consideration of the NPPF, impacts would equate to less than substantial harm to heritage significance.

Barn at Fairchild's Farm (MME6859)

- 4.1.52 The significance of the barn is derived principally from its historic and architectural interests. This building was grade II listed until 1993. The contribution of setting to understanding its significance and appreciating the associated interests is described below.

Historic and Architectural Interest

- 4.1.53 The barn is said to originate from the 18th century, as part of the Fairchild Farm. On the 1891 OS map, this building is abutted by a farmhouse to the south, and a wooden structure to the north. The structure to the south had been removed by 2000, and the northern structure was removed by 2005. The barn was redeveloped into a residential property, significantly impacting upon the historic fabric of the building. A historic boundary wall associated with the former farmstead is retained along Fox Bank Lane.

Setting of the Asset

- 4.1.54 The significance of the setting of the former barn is derived from its association with Fairchild Farm. All buildings on this former farmstead appear to have been converted into residential properties, thus significantly impacting the setting. The extent of the farmstead is still marked by the presence of a historic boundary wall along Fox's Bank Lane. Halsnead Park wall is set parallel to this, forming a clear separation between Fairchild Farm and the Site.

Impact Assessment

- 4.1.55 The heritage asset can be classed to be of low significance, based on its low retention of historic fabric and reduced setting. Having considered the nature and extent of the significance of the asset, including the contribution made by setting, it is concluded that the harm arising from the proposed development would be negligible. This would result in a **neutral significance** of impact.

War Memorial (MME20860)

- 4.1.56 The significance of the war memorial is derived principally from its historic, communal and architectural interests. The contribution of setting to understanding its significance and appreciating the associated interests is described below.

Historic, Communal and Architectural Interest

- 4.1.57 The historic interest of the memorial stems from its physical structure of commemoration to those which served in the first and second World Wars. The aftermath of the First World War saw the biggest single wave of public commemoration, with tens of thousands of memorials erected across England and the War Memorial is illustrative of the physical monuments erected as permanent tribute to the sacrifice made by the members of the local community who lost their lives in the First World War.
- 4.1.58 The memorial also holds interest being designed by Sir Giles Gilbert Scott and erected in the grounds of St. Nicholas Church. This memorial was hit by lightning and was destroyed in 1928. It was replaced with a new memorial by 1932. The memorial records the names of the fallen parishioners of the First World War, with additional tablets at the base of those from the parish who served and fell during the Second World War.
- 4.1.59 The memorial is of high communal value due to its connection to local people and their sacrifices made during both World War conflicts. The memorial is a symbol of sacrifice and will likely evoke strong emotional responses from the community.

Contribution of Setting

- 4.1.60 The setting of the memorial is principally derived from its position within the St Nicholas churchyard which offers an ambiance of peace and reflection appropriate to the nature of the memorial.
- 4.1.61 It is set to the east of the Grade II listed church, and adjacent to Windy Arbor Road. The rebuilt memorial is of lower height, thus has limited intervisibility with the site.

Impact Assessment

- 4.1.62 This heritage asset can be classed to be of low significance. Having considered the nature and extent of the significance of the asset, including the contribution made by setting, it is concluded that the harm arising from the proposed development would be negligible. This would result in **a negligible to minor adverse significance** of impact at most.

Halsnead Park Wall (MME15681)

- 4.1.63 The significance of the boundary wall is derived principally from its historic and architectural interests, as part of the 17th century parkland. The contribution of setting to understanding its significance and appreciating the associated interests is described

below.

Historic and Architectural Interest

4.1.64 Halsnead Park was originally the hunting estate of the Willis family, the chief landowners within the Whiston district between the 1680s and 1920s. The entire site, north and south of the M62, is known as Halsnead Park and it related to Halsnead Hall, now set to the south of the M62. The boundary wall is said to originate from the 18th or early 19th century. The garden and associated boundary wall has been heavily compromised by the construction of the M62 motorway in the 1970s. The wall has been replaced, removed or breached in numerous locations around the perimeter but survives well in others.

Setting of the Asset

4.1.65 The significance of the setting of the boundary wall is derived from its association with Halsnead Park. The wall forms a clear separation between the park and the surrounding fields and residential areas, and its course is mirrored by a road system. Modern housing had encroached upon the park boundary in the course of the 20th century, especially to the north and west.

Impact Assessment

4.1.66 The heritage asset can be classed to be of low significance, based on its low retention of historic fabric and reduced setting. Having considered the nature and extent of the significance of the asset, including the contribution made by setting, it is concluded that the harm arising from the proposed development would be minor. This would result in a **minor adverse** significance of impact.

Halsnead Park (MME15147)

4.1.67 The significance of the park is derived principally from its historic and aesthetic interests, with group value added by the features retained within the parkland. The contribution of setting to understanding its significance and appreciating the associated interests is described below.

Historic and Architectural Interest

4.1.68 Halsnead Park was originally the hunting estate of the Willis family, the chief landowners within the Whiston district between the 1680s and 1920s. The entire site, north and south of the M62, is known as Halsnead Park and it related to Halsnead Hall, now set to the south of the M62. The boundary wall is said to originate from the 18th or early 19th century. No landscape designer is known for the park.

Setting of the Asset

- 4.1.69 The park is set out as a naturalistic parkland landscape with Halsnead Hall in the centre. It was designed with trees lining the perimeter of the estate and engulfed farm and lodge buildings so that views across the landscape would not be impacted upon. The ha-ha, ponds and corpses of trees were used to create visual interest, which adds to both landscape and historic interest. This approach to landscape design is typical of the naturalistic style adopted during the 18th century. The garden and associated boundary wall has been heavily compromised by the construction of the M62 motorway in the 1970s, as well as the Halsnead Park estate within the centre of the site, and smaller modern developments at Fox Bank and Windy Arbor.
- 4.1.70 The 20th and 21st century developments have significantly undermined the coherence and significance of the landscape. Road noise from the M62 affects historically remote character of the park. Outside of these directly affected parts, little physical change has however occurred within the wider landscape of the park, and many features including its network of historic routes, and the small, enclosed pockets of settlements of farmsteads, are largely still intact.

Impact Assessment

- 4.1.71 Based on the cumulative value of all features associated with this heritage asset. Halsnead Park landscape can be classed to be of medium significance, based on the combined evidential, historic, aesthetic and communal values. It is concluded that the proposed detailed scheme would have a minor impact upon the heritage asset, resulting in a **minor adverse** significance of impact. In consideration of the NPPF, impacts would equate to less than substantial harm to heritage significance. The proposal to retain the surviving elements of the Park landscape within the site such as the two wooded areas will help to soften this impact.

5 CONCLUSION

5.1 Previous Impact Assessment (L-P Archaeology, 2020)

- 5.1.1 The Impact Assessment produced in 2020 assessed heritage assets which were considered to be potentially affected by the proposed development. The assessment identified four designated built heritage assets as sensitive receptors: Church of St Nicholas Windy Arbour Road (Grade II Listed); Sandfield Cottage, Lickers Lane (Grade II Listed); North East Lodge to Halsnead Park, Fox's Bank Lane (Grade II Listed); and Gate piers beside North East Lodge (Grade II Listed).
- 5.1.2 All four of these assets are of medium importance / value and moderate sensitivity with the level of potential impact to the significance of the assets ranging from negligible to minor adverse significance.
- 5.1.3 Overall, eight non-designated heritage assets were identified as being potentially sensitive receptors to the proposed development. These assets were largely related to the former Halsnead Park estate and included: historic routes through the landscape specifically Main Drive, and remnants of Cock Glades; the former Lodge, gate piers and flanking walls at the junction of Windy Arbour Road and Main Drive; the Trout pond beside Main Drive; the Pond to east of the Mobile Home Park; the historic remnants of the Prince's House complex; the stone park wall; the historic clumps/belt of trees along Lickers Lane and adjacent Main Drive; and the Site of ruin noted on 1850 OS.
- 5.1.4 All eight assets are of low importance/ value and of low sensitivity, however, the cumulative value of the surviving features of the estate were judged to be moderate sensitivity.
- 5.1.5 The level of potential impact to the significance of the assets from the proposed development was concluded to be up to minor adverse.

5.2 Updated Impact Assessment (August 2023)

- 5.2.1 The previous 2020 assessment already addressed potential impact to all relevant designated heritage assets. No additional impacts to the significance of designated heritage assets as a consequence of the detailed design are anticipated to result with the previously identified minor (slight) adverse impacts to the significance of the two listed assets associated with Halsnead Park (the Grade II listed North-East Lodge and the Gate Piers) and the negligible impact to the significance of Sandfield House remaining from the detailed design. No impact upon their heritage significance was detected for the other designated heritage assets around and associated with

Halsnead Park (the grade II listed Carr House, Paddock and Barn, and the former Barn at Snape Gate). These impacts would equate to less than substantial harm to heritage significance. In accordance with Paragraph 202 of the NPPF, any less than substantial harm to the significance of a designated heritage asset should be weighed against the public benefits offered by the proposed development. Public benefits to consider within this balance are presented within with the Planning Statement.

- 5.2.2 A reduction in the impact to the significance of St Nicholas Church could be identified with the removal of the parcel of land to the east to Windy Arbour from the application Site.
- 5.2.3 In respect to the additional three non-designated, upstanding heritage assets identified as part of the baseline review, these assets are assessed to be of low significance and the proposed development would result in a neutral to slight at most significance of impact. While Halsnead Park, a non-designated heritage asset, can be classed to be of medium significance, the proposed development would only result in minor adverse significance of impact. In accordance with para 203 of the NPPF, a balanced judgement is required having regard to the scale of any harm or loss of significance and the significance of the non-designated heritage asset. Harm to the significance of non-designated heritage assets would be minor which on assets of low significance should, in having a balanced judgement, be afforded minor weight only.
