

The diagram illustrates a geometric figure composed of a square and a right-angled triangle. The square is on the left, and the triangle is on the right, sharing a common hypotenuse. The entire figure is filled with a brick pattern, with the bricks in the triangle oriented diagonally to match the slope of the hypotenuse.

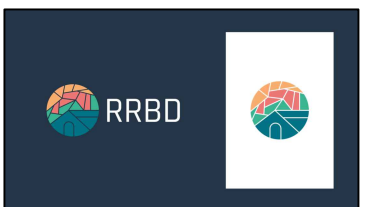

The second floor plan includes a Study, Bedroom 1, Bedroom 2, a Bathroom, and a central Hallway. A closet is located off the hallway near the stairs. The layout is irregular, following the shape of the building's footprint.

Floor plan of the first floor. The layout includes a large Living Room on the left, a Kitchen on the right, a Hallway in the center, a Storage area with stairs, and a WC (Toilet) at the bottom right. The house has a gabled roof with dormer windows.

A 2D architectural elevation of a house. The roof is dark grey with a gabled shape on the right side. The walls are orange with a brick pattern. There are four windows: two on the upper floor and two on the lower floor, each with a white frame and a yellow sill. A central white door with a small transom window is located on the lower floor. A vertical line divides the house into two halves.
