

Arboricultural Update – McCarthy Stone, St. Chad's Drive, Kirkby

5 June, 2025

Preliminary works are now underway at St. Chad's Drive, Kirkby with site welfare now arriving on site and a management team now permanently based there.

Prior to more extensive works happening on site, Andrew Hastings, Principal Arboricultural Consultant at Middlemarch, is booked in for an Arboricultural Pre Commencement Site Meeting with us to ensure the protective measures we have in place are sufficient for the building works programmed ahead. Any advice or guidance given during the meeting to further protect the trees and foliage during the various construction phases will be duly followed.

A further update outlining the outcomes of the site meeting will be distributed after the meeting, which is scheduled for 24th June 2025.

In the meantime, please find below photos of current protective measures in place, with appropriate signage as well as a toolbox talk undertaken on the first day on site, as well as it being a topic mentioned at everyone's induction on their first day on site.
