

PROVISION OF BAT BOXES—INITIAL PHASE OF CONSTRUCTION AT KIRKBY GOLF COURSE

PLANNING CONSENT 21/00744/FUL - CONDITION 36 (June 2025).

The proposed locations and types of bat box to be positioned during the initial phase of the construction of the proposed creation of the new 9 hole par 3 golf course at land south of Kirkby Golf Course, Ingoe Lane, Knowsley, L32 4SS. Positions and effectiveness of initial placements to be monitored and assessed bi-annually. Introduction of further bat boxes, including possible suitability of constructed buildings to be assessed bi-annually.

Boxes Ideally Suited to Trees

Hibernation Bat Box: During the hibernation period bats need constant cool temperatures. Therefore, the hibernation box shall be located on the northern aspect of mature trees, away from direct sunlight. Ideally within woodland areas and not on individual scattered trees, throughout the site.

Bat Hibernation Box – ideal for use on mature trees, the box is very heavy and will require a good firm fixing to make sure it is safe. Dimensions: 500 x 380 (diameter) mm.

Schwegler 1FW Bat Hibernation Boxes

Maternity Bat Box: to provide suitable maternity roosting habitat on site. During the maternity period bats require warm temperatures to raise young. The maternity bat box should, therefore, be positioned where it is unshaded for most of the day, ideally with a southerly or westerly aspect.

The internal space is suitable to support groups of smaller female bats assembling for maternity purposes. Dimensions: 360 x 160 (diameter) mm. Ideal for trees.

Schwegler 1FD Maternity Bat Box

General Purpose Bat Box: These provide roosting opportunities for many bat species, in particular pipistrelle and noctule species. General bat boxes should be sited on trees in groups of three, located on the south westerly, southerly and south easterly aspects to provide various temperatures and conditions. General bat boxes should be positioned in places where they are unshaded for most of the day.

General Purpose Bat Boxes can be located together, ideally on trees. Dimensions: 330 x 160 (diameter) mm.

PROVISION OF BIRD BOXES—INITIAL PHASE OF CONSTRUCTION AT KIRKBY GOLF COURSE

PLANNING CONSENT 21/00744/FUL - CONDITION 36 (June 2025).

The proposed locations and types of bird box to be positioned during the initial phase of the construction of the proposed creation of the new 9 hole par 3 golf course at land south of Kirkby Golf Course, Ingoe Lane, Knowsley, L32 4SS. This area takes into account land immediately adjacent to the proposed project.

Positions and effectiveness of initial placements to be monitored and assessed bi-annually. Introduction of further bird boxes, including possible suitability of constructed buildings to be assessed bi-annually.
