

Bowring Park and Golf Course - Development

Project Description:

The project comprises the retention and extension of an outdoor kitchen and covered seating area at the Coach House, ensuring continued high-quality service. Additionally, we propose the construction of a new Park House within the woodland, providing flexible indoor space for a variety of community activities and events. Further developments include a new golf reception, shop, and buggy storage facility, designed to improve accessibility and enhance operational efficiency while preserving the site's historic and scenic character.
