

TNE1256915 Liverpool site report

Date of visit:	Co-ordinates: slide 3 and 12
24/09/20	Address: slide 3 and 12

The target trees were identified from the information supplied in the planner request. There were two areas tagged TA1 and TA2.

Tree Area 1. Details removed from this version of the report.

Tree Area 2(TA2) was a lone scots pine tree within a wooded area behind the caravan park, the tree was behind a 6ft wall and partially overhung one of the static caravans. The tree base was around 1m diameter.

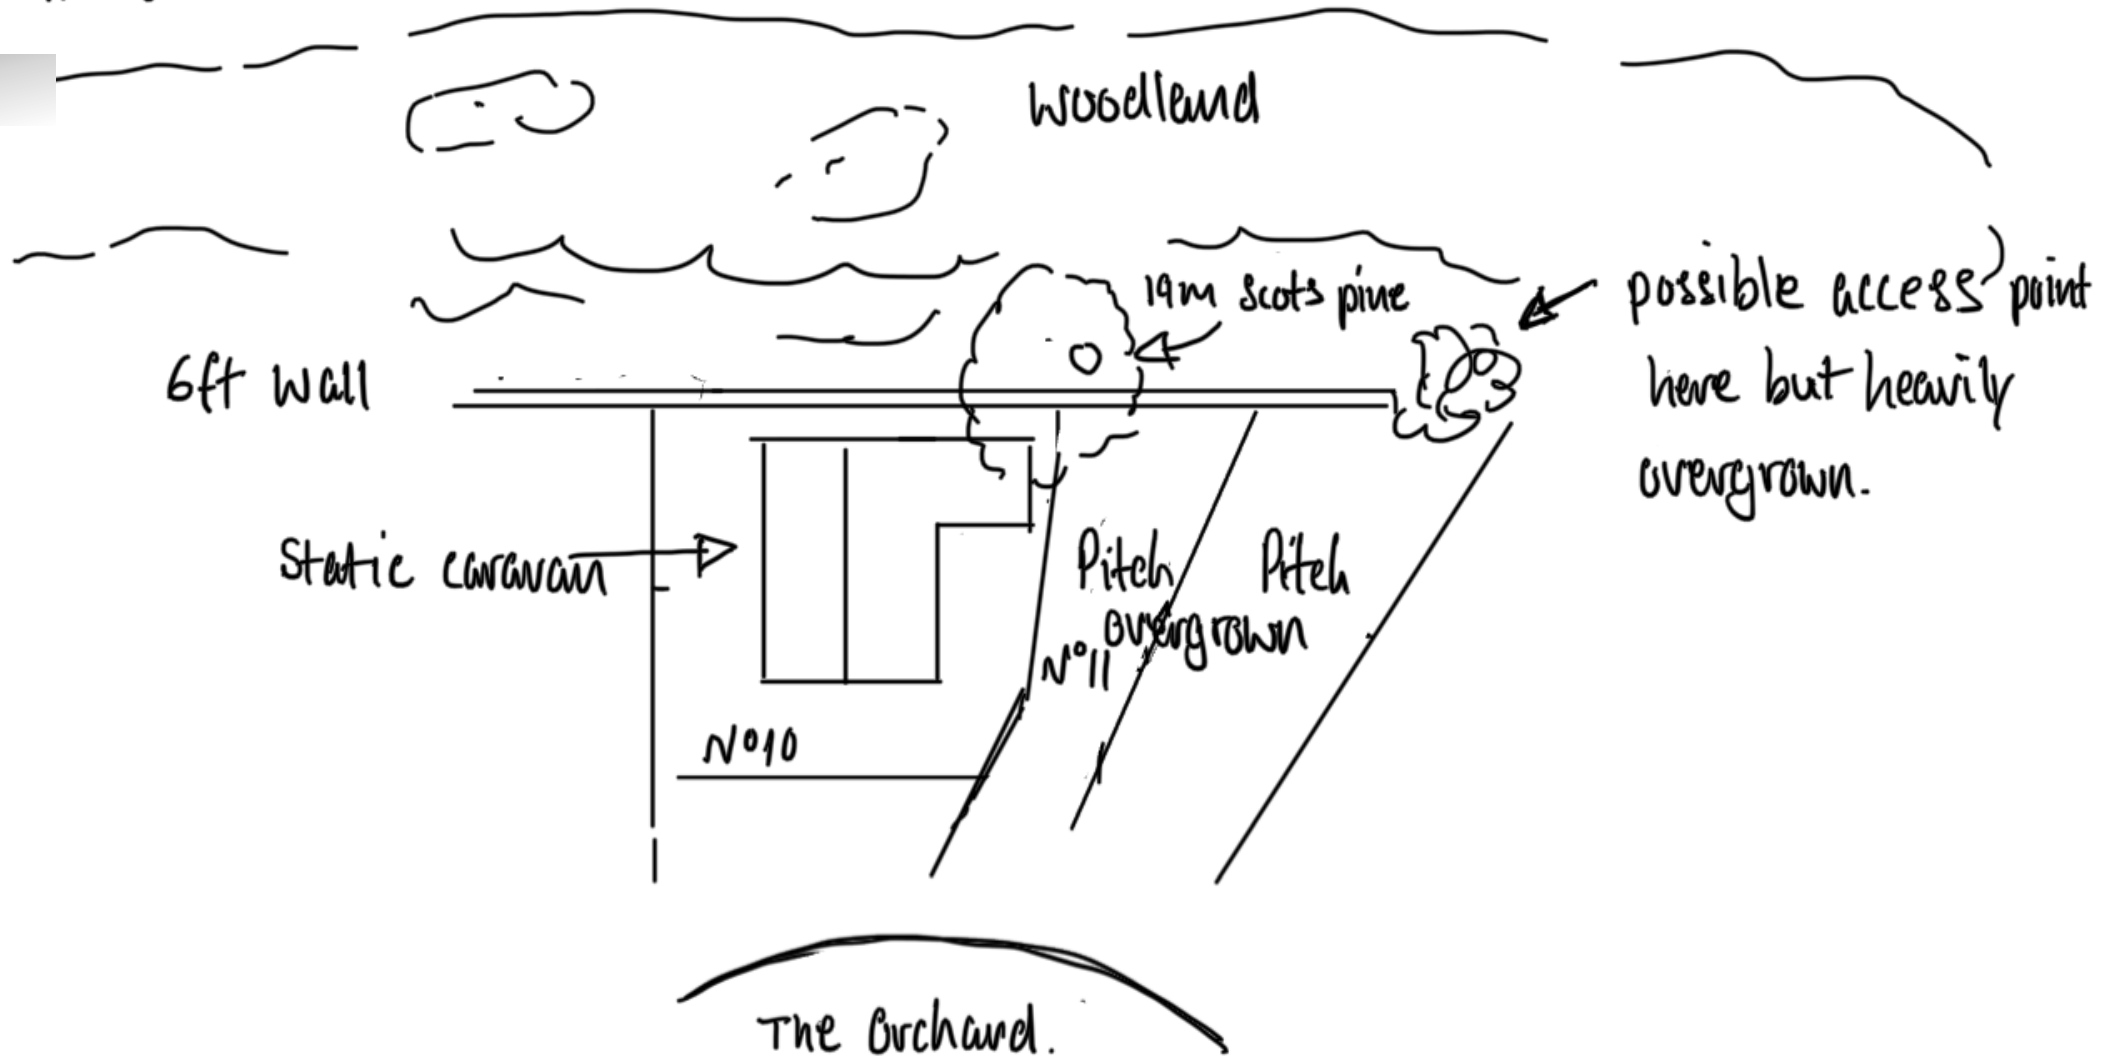

Access to the tree was difficult due to the wall and heavy undergrowth which surrounded the area, however I did manage to gain access after a long walk from Woodend Lane.

Mrs Kinsey has asked rather than prune the tree she would prefer for it to be taken down entirely. Its worth mentioning that removal of arising's will be difficult, so arrangements should sought to leave these within the woodland if possible.

All measurements are approximate and should be checked and confirmed by climbers on site before work commences.
