

Knowsley Council

**REGENERATION AND ECONOMIC DEVELOPMENT
DEPARTMENT**

TOWN AND COUNTRY PLANNING ACT 1990

PLANNING PERMISSION

Application No: 22/00562/FUL

Name and address of applicant

Mr Evans
26 Deerbolt Crescent
Kirkby Park
Knowsley
Kirkby
L32 2BE

Name and address of agent

Studio Attis
Suite 309
First Floor
St James Street
Liverpool
L1 0AB

Date of Receipt: 11 September 2022

Date Valid: 12 October 2022

Address/Location Of Development:

24 Deerbolt Crescent
Kirkby Park
Kirkby
Knowsley
L32 2BE

Description of Development:

ERECTION OF SINGLE STOREY FRONT EXTENSION

The Council of the Metropolitan Borough of Knowsley hereby give notice in pursuance of the above Act(s) that Planning Permission has been **granted** for the carrying out of the development referred to above in accordance with the application and plans submitted subject to the following condition(s):

1. The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason: In order to comply with the requirements of Section 91 of the Town and Country Planning Act 1990 (as amended).

2. The development hereby permitted shall be carried out in accordance with the approved plans and documents listed in Schedule 1.

Reason: For the avoidance of doubt.

3. The materials to be used on the external surfaces of the extension hereby permitted shall match those of the existing building in type, size, colour and texture.

Reason: In the interests of visual amenity and to comply with Saved Policy H8 of the Knowsley Replacement Unitary Development Plan, adopted in June 2006, Policy CS19 of the Knowsley Local Plan Core Strategy, adopted January 2016, and the National Planning Policy Framework.

SCHEDULE 1

Date Received	Ref. No	Version	Drawing/Document Title
11/09/2022	02.02.002	REV 01	LOCATION PLAN
25/10/2022	2261-02-04-002	REV 1	PROPOSED SITE PLAN
25/10/2022	2261-02-02-004	REV 1	PROPOSED FLOOR PLANS AND ELEVATIONS

REASON(S) FOR THE GRANTING OF PLANNING PERMISSION

The decision to grant planning permission has also been taken having regard to the policies and proposals as set out below, and to all relevant material considerations including supplementary planning guidance:-

CS2 - Development Principles
CS19 - Design Quality and Accessibility in New Development
H5 - Development within Primarily Residential Areas
H8 - Extensions and Alterations to Residential Properties
Householder Development SPD (2016)

This informative is only intended as a summary of the reason(s) for the granting of planning permission. Should you require any further details relating to the decision please contact the relevant case officer (John Fleming on 0151 443 2216)

ARTICLE 35 STATEMENT

The Local Planning Authority has acted positively and proactively in determining this application by identifying matters of concern within the application (as originally submitted) and negotiating with the applicant, acceptable amendments to the proposal to address those concerns. As a result, the Local Planning Authority has been able to grant planning permission for an acceptable proposal, in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

NOTE FOR APPLICANT:

IMPORTANT - PLEASE READ CAREFULLY THE NOTES BELOW AS FAILURE TO COMPLY COULD MAKE THE DEVELOPMENT HEREBY PERMITTED UNAUTHORISED

- 1) This planning permission is granted in strict accordance with the approved plans. It should be noted however that:
 - a) Any variation from the approved plans following commencement of the development, irrespective of the degree of variation, will constitute unauthorised development and may be liable to enforcement action.
 - b) You or your agent or any other person responsible for implementing this permission should inform Planning Services immediately of any proposed variation from the approved plans and ask to be advised as to the best method to resolve the matter. Most proposals for variation to the approved plans will require the submission of a new planning application.
- 2) This permission is granted subject to conditions and it is the owner of the property and the person responsible for the implementation of the development who will be fully responsible for their compliance throughout the development and beyond.

- 3) If there is a condition that requires work to be carried out or details to be approved prior to the commencement of the development this is called a "condition precedent". The following should be noted with regards to conditions precedent.
 - a) If a condition precedent is not complied with prior to the start of development, the whole of the development will be unauthorised and you may be liable to enforcement action.
 - b) In addition, if the requirements of a condition precedent are subsequently not complied with, the development is unauthorised and the only way to rectify the development is the submission of a new application.

If any other type of condition is breached, then you will be liable to a breach of condition notice.

NOTE FOR APPLICANT: The applicant's attention is drawn to the following comments.

- 1) See attached letter from Network Rail

Executive Director - Regeneration and Economic Development

Date: 14 December 2022

IMPORTANT NOTES FOR YOUR ATTENTION:

- 1. This permission refers only to that required under the Town and Country Planning Acts and does not include any consent or approval under any other enactment, bylaw, order or regulation.**
- 2. This permission refers only to those plans submitted as part of the Planning Application a copy of which is retained by the Local Planning Authority. The Local Planning Authority should be contacted in writing if it is proposed to amend these plans in any way as a further permission, may be required.**
- 3. You should ensure that you understand the requirements of all planning conditions and that you fully comply with their requirements. If you are in any doubt about what a condition requires of you, please ask us for assistance. Planning conditions may require you to submit further information to us and await our approval before you can start your development. A failure to do so could result in your development being unlawful and necessitate the submission of a further planning application. A failure to comply with the conditions of the permission/consent may result in the taking of enforcement and potentially legal action, against you to remedy the breach of planning control.**
- 4. A fee is normally payable to discharge planning conditions in accordance with government regulations.**
- 5. This permission does not convey any rights or approval to build on, or develop, any land that is not fully owned or controlled by you, including on party boundaries. You should satisfy yourself that the agreement of any adjoining landowners has been given prior to commencing any building works.**
- 6. If a Building Regulations Consent is required for these works it is your responsibility to ensure that the plans submitted for both the Building Regulations Consent and Planning Permission are the same in all respects. Should the plans relating to one consent vary from the other, it will be necessary for you to submit amended plans to this Department and obtain the relevant approval(s) prior to commencing any works. Knowsley Council's Building Control team are contactable on (0151)-443 2342 and they would be pleased to assist you.**

Appeals to the Secretary of State

- If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.
- As this is a decision for a householder application, if you want to appeal against your local planning authority's decision then you must do so within 12 weeks of the date of this notice.
- Appeals can be made online at: <https://www.gov.uk/planning-inspectorate>.
If you are unable to access the online appeal form, please contact the Planning Inspectorate to obtain a paper copy of the appeal form on tel: 0303 444 5000.
- The Secretary of State can allow a longer period for giving notice of an appeal but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.
- The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.

22/00562/FUL

**PROPOSAL: ERECTION OF SINGLE STOREY FRONT
EXTENSION**

**LOCATION: 24 Deerbolt Crescent, Kirkby Park, Kirkby,
Knowsley, L32 2BE**

With reference to the protection of the railway, Network Rail has no objection in principle to the proposal, but below are requirements which MUST be met as the proposal includes works within 10m of the railway boundary and an interface with the railway boundary.

For further general information on interfacing with Network Rail please see the link on our website:

[Living by the railway - Network Rail](#)

To the council - please forward the attached documents/forms/asset protection contact details to the applicant for actioning. An interface with Network Rail is REQUIRED for this proposal – the outside party is advised that Network Rail will need to agree and supervise this proposal.

This is to ensure that the works on site, and as a permanent arrangement, do not impact upon the safe operation and integrity of the existing operational railway and for the avoidance of doubt of both the council and the developer who may not be aware of the potential for outside party proposals to impact upon the railway.

Please note that Network Rail may submit further comments on this proposal if required in addition to the comments below.

Network Rail recognises that conditions are imposed for a planning purpose and that they are fairly and reasonably related to the development and not be manifestly unreasonable. We believe that the comments included in this email are indeed fair and reasonable and relate to Network Rail's need to ameliorate the impacts that might otherwise flow from the development.

Measurements to railway tracks and railway boundary

When designing proposals, the developer and council are advised, that any measurements must be taken from the operational railway / Network Rail

boundary and not from the railway tracks themselves. From the existing railway tracks to the Network Rail boundary, the land will include critical infrastructure (e.g. cables, signals, overhead lines, communication equipment etc) and boundary treatments (including support zones, vegetation) which might be adversely impacted by outside party proposals unless the necessary asset protection measures are undertaken. No proposal should increase Network Rail's liability. To ensure the safe operation and integrity of the railway, Network Rail issues advice on planning applications and requests conditions to protect the railway and its boundary.

Obligations

Properties adjoining or in the vicinity of the railway are frequently the subject of obligations, rights, exceptions and reservations for the benefit of Network Rail's land and railway. The applicant must review the title to their property to see whether any such obligations etc exist and ensure that there is no non-compliance or breaches of them or any interference with or obstruction of Network Rail's rights and reservations. If the proposed development would not comply with or would breach any of the terms of the conveyance, the developer must revise his proposals.

RAMS

The developer is to submit directly to Network Rail asset protection, a Risk Assessment and Method Statement (RAMS) for all works to be undertaken within 10m of the operational railway under Construction (Design and Management) Regulations, and this is in addition to any planning consent. Network Rail would need to be re-assured the works on site follow safe methods of working and have also taken into consideration any potential impact on Network Rail land and the existing operational railway infrastructure. Builder to ensure that no dust or debris is allowed to contaminate Network Rail land as the outside party would be liable for any clean-up costs. Review and agreement of the RAMS will be undertaken between Network Rail and the applicant/developer.

Network Rail would request that a condition is included in the planning consent as follows:

"A method statement and risk assessment must be submitted to the council and Network Rail for review and agreement prior to works commencing on site."

REASON: To ensure that the construction and subsequent maintenance of the proposal can be carried out without adversely affecting the safety, operational needs or integrity of the railway.

Encroachment

The developer/applicant must ensure that their proposal, both during construction, and after completion of works on site, does not affect the safety, operation or integrity of the operational railway, Network Rail land and its infrastructure or undermine or damage or adversely affect any railway land and structures.

- . There must be no physical encroachment of the proposal onto Network Rail land, no over-sailing into Network Rail air-space and no encroachment of foundations onto Network Rail land or under the Network Rail boundary.
- . All buildings and structures on site including all foundations / fencing foundations must be constructed wholly within the applicant's land ownership footprint.
- . Buildings, windows and structures must not over-sail Network Rail air-space/boundary.
- . Any future maintenance must be conducted solely within the applicant's land ownership.
- . Rainwater goods must not discharge towards or over the railway boundary
- . Should the applicant require access to Network Rail land to facilitate their proposal they would need to approach the Network Rail Asset Protection Team at least 20 weeks before any works are due to commence on site. The applicant would be liable for all costs incurred in facilitating the proposal and an asset protection agreement may be necessary to undertake works. Network Rail reserves the right to refuse any works by an outside party that may adversely impact its land and infrastructure.
- . Any unauthorised access to Network Rail air-space or land will be deemed an act of trespass.

Scaffolding

Scaffolding which is to be constructed within 10 metres of the Network Rail / railway boundary must be erected in such a manner that at no time will any poles over-sail the railway and protective netting around such scaffolding must be installed. The applicant / applicant's contractor must consider if they can undertake the works and associated scaffolding / access for working at height

within the footprint of their land ownership boundary. The applicant is reminded that when pole(s) are erected for construction or maintenance works, they must have a minimum 3m failsafe zone between the maximum height of the pole(s) and the railway boundary.

This is to ensure that the safety of the railway is preserved, and that scaffolding does not:

- . Fall into the path of on-coming trains
- . Fall onto and damage critical and safety related lineside equipment and infrastructure
- . Fall onto overhead lines bringing them down, resulting in serious safety issues (this is applicable if the proposal is above the railway and where the line is electrified).

Network Rail would request a condition is applied as follows within the planning consent:

“Details of scaffolding works within 10m of the railway boundary, to be submitted to the council and Network Rail for agreement.”

Reason - In the interests of protecting the railway and its boundary from over-sailing scaffolding.

Drainage proposals and Network Rail land

The applicant must ensure that the proposal drainage does not increase Network Rail’s liability, or cause flooding pollution or soil slippage, vegetation or boundary issues on railway land. Therefore, the proposed drainage on site will include the following:

- . All surface waters and foul waters must drain away from the direction of the railway boundary.
- . Soakaways for the proposal must be placed at least 30m from the railway boundary.
- . Any drainage proposals for less than 30m from the railway boundary must ensure that surface and foul waters are carried from site in closed sealed pipe systems.

Excavation and Earthworks and Network Rail land:

The applicant will agree all excavation and earthworks within 10m of the railway boundary with Network Rail. Network Rail will need to review and agree the works to determine if they impact upon the support zone of our land and

infrastructure as well as determining relative levels in relation to the railway. Network Rail would need to agree the following:

- . Alterations to ground levels
- . De-watering works
- . Ground stabilisation works
- . Works to retaining walls
- . Construction and temporary works
- . Maintenance of retaining walls
- . Ground investigation works must not be undertaken unless agreed with Network Rail.
- . Confirmation of retaining wall works (either Network Rail and/or the applicant). Prior to the commencement of works on site the applicant must confirm with Network Rail if there are any retaining walls/structures and the applicant must interface with Network Rail to ensure that no retaining structures are impacted on a permanent basis by their proposal.
- . Alterations in loading within 15m of the railway boundary must be agreed with Network Rail.
- . For works next to a cutting or at the toe of an embankment the developer / applicant would be required to undertake a slope stability review.

Network Rail would need to review and agree the methods of construction works on site to ensure that there is no impact upon critical railway infrastructure. No excavation works are to commence without agreement from Network Rail. The council are advised that the impact of outside party excavation and earthworks can be different depending on the geography and soil in the area. The council and developer are also advised that support zones for railway infrastructure may extend beyond the railway boundary and into the proposal area. Therefore, consultation with Network Rail is requested. Any right of support must be maintained by the developer.

Network Rail requests a condition is included in the planning consent as follows:
Condition:

"Prior to the commencement of the development full details of ground levels, earthworks and excavations to be carried out near to the railway boundary shall be submitted to the Local Planning Authority and Network Rail."

Reason: To protect the adjacent railway and its boundary.

Boundary treatments

Any structures on the applicant's land which runs seamlessly into a section of Network Rail infrastructure will require Network Rail agreement/comments

and interface/supervision to ensure that there is no impact to or increase in risk to Network Rail assets.

3m Gap

Network Rail **REQUIRES** that the developer includes a minimum 3 metres gap between the buildings and structures on site and the railway boundary. Less than 3m from the railway boundary to the edge of structures could result in construction and future maintenance works being undertaken on Network Rail land, and close to the railway boundary potentially impacting support zones or lineside cabling. All the works undertaken to facilitate the design and layout of the proposal should be undertaken wholly within the applicant's land ownership footprint including all foundation works. Network Rail requires a minimum 3m easement between structures on site and the railway boundary to ensure that we can maintain and renew our boundary treatments. No part of the structure should over-sail the railway boundary or discharge rainwater goods onto or toward the railway boundary.

BAPA (Basic Asset Protection Agreement)

As the proposal includes works which could impact the existing operational railway and in order to facilitate the above, a **BAPA** (Basic Asset Protection Agreement) will need to be agreed between the developer and Network Rail. The developer will be liable for all costs incurred by Network Rail in facilitating this proposal, including any railway site safety costs, possession costs, asset protection costs / presence, site visits, review and agreement of proposal documents and any buried services searches. The BAPA will be in addition to any planning consent.

The applicant / developer should liaise directly with Asset Protection to set up the BAPA (form attached).

AssetProtectionLNWNorth@networkrail.co.uk

No works are to commence until agreed with Network Rail. Early engagement with Network Rail is strongly recommended.

Should the above proposal be approved by the council and should there be conditions, where the proposal interfaces with the railway (as outlined in this response) the outside party is advised that a BAPA (Basic Asset Protection

Agreement) must be in place, in order for Network Rail to review and agree the documentation and works outlined in conditions (and those areas covered by the discharge of conditions). Network Rail recommends that the applicant ensures that the BAPA is in place and that Network Rail has reviewed and agreed the documents as part of the discharge of any conditions.

The applicant is advised that before the proposal progresses (should it be approved) they will be required to submit the development form to Network Rail's Asset Protection team and agree the BAPA before any works commence on site.

Network Rail is a Government funded Organisation and we are expected to recover our involvement costs from this type of interface, to proceed in more detail with discussions a signed Basic Asset Protection Agreement (BAPA) would be required to be in place.

Permanent impacts of development are usually material considerations (such as the position of permanent structures, or drainage design etc) and where these are likely to occur, requests for planning conditions or scheme amendments are requested to protect the existing railway infrastructure from the impacts of the works on site and as a permanent arrangement. Controls on the temporary impact of construction to outside party land should also be picked up via building control, or in some cases a party wall surveyor.

Once the attached Asset Protection Questionnaire/dev link has been completed and forwarded to the team the enquiry will then be processed and an email sent to the applicant giving a project reference number and name of person with the asset protection team that will deal with the enquiry.

For further information on interfacing with Network Rail please see the link on our website:
