K BARRIERS

THE UK'S PREMIER ACCESS BARRIER

Flexible, Friendly, Effective

K Barrier Designs are protected by a suite of Intellectual Property Rights including Patent No. GB2392192 Registered design Nos. 3013060 and 3021137 and European Design Registration no 000340146. K Barrier is a registered Trade Mark of K Barriers Ltd. K Barriers Ltd are Designers, Patent and Design Rights holders and exclusive suppliers of the K Barrier, Simple K Barrier and K Barrier Gate in the UK

Problems with motorbikes?

Need an effective motorcycle control that's accessible for wheelchairs, mobility scooters, double buggies and bicycles, even when towing child trailers?

With a wide range of options to suit your access requirements and budget, K Barriers have the answer.

Available in Dual Adjustment, Standard and Simple forms and even mounted in a gate all K Barriers offer flexibility with effectiveness. Their smooth curved shape and adjustable width mean K Barriers are friendly for people with visual impairment too. High Visibility elements help to warn of the Barriers presence.

How do they work? The length and depth of the squeeze plates coupled with innovative width adjustment make K Barriers a very effective motorcycle control. Manufactured from stainless steel on the Standard and Dual Adjustment K Barrier and mild steel on the Simple K Barrier all squeeze plates are specially edged to make them safe to hold for support and confidence and safe for clothing too. Available in a range of depths on the Dual Adjustment and Standard K Barrier it's easy to tailor your K Barrier to your requirements. Optional steel mesh floor panels provide a reliable surface in the high wear area at the centre of the barrier. Install additional panels either side to extend this and reduce step formation.

Setting your gap width to suit your site or comply with Local Authority guidelines before installation is simple. Opt for the Dual Adjustment K Barrier and adjustment after installation is simple too even in Tarmac!

For the smallest of budgets the fixed width* A Frame Barrier is available. Direct from the designer with many improvements including increased length, rounded edges for handling safety and High visibility components.

All our barriers are hot dip galvanized after manufacture to increase their longevity. Colour powder coating is available to match colour schemes and improve the look of the barrier.

** Double, side-by-side design, pushchairs and larger wheelchairs and mobility scooters may need extra access space provided by our K Barrier range of products, please ask for details.*

Standard K Barrier

(Patent No GB2392192)

The original K Barrier with all the benefits built in:

Adjustable Width Design

Underground only.

Stainless Steel 'Squeeze Plates'

Range of depths available.

High Visibility Labels

Robust & Resilient

Optional Steel Mesh Floor Panels

Colour Powder Coating Available

Squeeze plates are not coated.

Supplied 'Flat Packed'

Easy to transport, handle & store.

Dual Adjustment

K Barrier *(Patent No GB2392192)*

Designed for bound surfaces, all the attributes and flexibility of a Standard K Barrier and more:

Adjustable Width Design

Underground and aboveground.

Adjustment at Squeeze Plates

Up to 50mm of additional adjustment after installation.

Stainless Steel 'Squeeze Plates'

Range of depths available.

Interchangeable Squeeze Plates

Easy to change or replace.

Colour Powder Coating Available

Squeeze plates are not coated.

Supplied 'Flat Packed'

K Barrier Gate

(Patent No GB2392192)

Access for maintenance and emergency vehicles as well as adjustable access for mobility scooters, wheelchairs, double buggies, pedestrians and cycles in one structure. Hinge-less construction means no hinges to be tampered with or present a weak point. Made to measure means* effective where space is at a premium.

Vehicle Access - Twin leaf gate.

Pedestrian Access – Dual Adjustment K Barrier

Hinge-less Construction

Made to Measure

Colour Powder Coating Available – Squeeze plates are not coated.

One Installation

** Very large gaps may require additional fencing; very small gaps may require additional space for gate in open position.*

Simple K Barrier

(Patent No GB2392192)

Designed especially with smaller budgets in mind.

Mild Steel Construction

All mild steel, standard size (360mm) welded on squeeze plates.

Adjustable Width Design

High Visibility Labels

Safety Edged Squeeze Plates

Optional Steel Mesh Floor Panels

Colour Powder Coating Available

Including the squeeze plates.

Supplied 'Flat Packed'

A Frame Barrier

A budget fixed width access barrier.

Direct from the designer

Improved Design

Fixed Width*

Robust Structure - Fully welded.

Supplied as One Piece Structure

Side Posts - supplied attached or separate, close off smaller gaps.

Colour Powder Coating Available

** Double, side-by-side design, pushchairs and larger wheelchairs and mobility scooters may need extra access space provided by our K Barrier range of products, please ask for details.*

A Frame Trojan Gate

Twin leaf, flat panel gate with an A Frame mounted in the middle, vehicle and pedestrian access in one simple structure.

Robust

Fixed Width*

Flat Panel Design

Lighter, slim-line panels.

Colour Powder Coating Available

** Double, side-by-side design, pushchairs and larger wheelchairs and mobility scooters may need extra access space provided by our K Barrier range of products, please ask for details.*

Optional Extras & Specialist Products

A wide range of additional products are available to compliment your Barrier

Floor Panel – Recommended for unbound surfaces; fitted in the centre of K Barriers to reduce erosion.

Additional Floor Panels - For use each side of the Barrier.

Adjustable fencing brackets - Allow you to secure fencing to Barrier without losing the ability to adjust it.

Additional High Visibility Labels - Use in addition to four already attached to K Barrier to highlight the presence of the barrier for visually impaired users.

Extra ground fixing kit - To use if relocating a K Barrier.

Side Posts – Available for all designs of barrier; ideal for closing off smaller gaps in alley ways etc. Come with 4 adjustable brackets.

Fencing - Heavy duty rhomboid rail fencing and pedestrian guard rail, manufactured to order. 'Diamond' shape reduces perching therefore can help to reduce congregation at site.

Colour Powder Coating Available – match your colour scheme and improve the appearance of the Barrier.
