

### Standard Metal Range Gates - Specification

Note - Our 'Standard Range' still carries a substantial weight and quality, unlike other lightweight/wire like gates on the market.

- **Main Frame** - 30mm x 10mm flat bar. (larger gates may have a 30mm x 30mm SHS frame).
- **Main Vertical Infill Bars** - 12mm round bar.
- **Mid Horizontal Rail** (if applicable) - 30mm x 10mm flat bar.
- **Dog Bars** (bottom half bars) (if applicable) - 12mm round bar.
- **Gate Arch** (if applicable) - Dependant on design - 30mm x 10mm flat bar.
- **Hinge System** - 12mm Adjustable hinge setup (may vary depending on setup size and requirements).
- **Metalwork Finish** - Hot dip galvanising as standard. Top coat - industrial powder coating (optional).
- **Latch** - Standard gate latch (slip bolt optional extra if required).
- **Professional Locinox System (optional)** - Can be added to allow lock and key to be used.
- **Posts (optional)** - Dependant on gate size
- **Country Of Origin** - Proudly 100% bespoke manufactured, within our UK workshop with British steel.
