The image contains two simple line drawings of houses. The house on the left is a small structure with a gabled roof. The entire gable and the lower walls are filled with a red brick pattern. A single, small, rectangular window is positioned on the right side of the house, just below the roofline. The house on the right is larger and more complex. It features a white gabled roof. The main body of the house is white. On the right side, there is a chimney structure also filled with a red brick pattern. There are several windows: a small square window on the left side of the main floor, a larger rectangular window in the center of the main floor, and a small rectangular window on the right side of the main floor. The roofline is simple, with a peak in the center.

SIDE ELEVATION

Architectural floor plan of an existing building. The plan shows a large rectangular area labeled "EXISTING BUILDING". A proposed "NEW FIRE DOOR" is indicated by a semi-circular symbol at the bottom left corner. A "NEW OPENING" is shown as a curved line extending from the fire door area into the building. A "BREAK OUT" is indicated by a curved line extending from the opening area. A "bin store" is located at the bottom left corner, adjacent to the fire door. The plan also shows a staircase area with vertical lines representing steps.

A diagram of a house with a red brick chimney on the left side. The chimney has a square window with a blue-to-yellow gradient. The house has a white roof and walls. The diagram is divided into four quadrants by a vertical and a horizontal dotted line.
