Robust cold-rolled steel | Galvanised to BS EN ISO 1461:2009 standard
Permanent and Durable | Intimidating and Anti-Climb design | High level of security

Height

1800mm
2000mm

Galvanised Steel Posts

We offer Bolt Down Posts and Dig-In Posts from a selection of heights; all made from high quality galvanised steel and fabricated at our Midlands manufacturing centre.

Width

2750mm

Post Types

Dig-In
Bolt Down

Anti Tamper Fixing

Clever Anti-Tamper fixings have the capability to snap off at the end to prevent the Palisade system for being dismantled.

Material

Galvanised Steel

Optional Finish

Polyester Powder Coating:

Green Black Blue Other Colours Available

'W' Section Pales

The most important feature of Palisade System are the 'W' Section Pales which offer great rigidity. With triple points cut into the top of the steel, the fencing becomes difficult to climb and will prevent any potential intruders.
