

<u>APPLICATION NO:</u>	24/00634/FUL	<u>CASE OFFICER:</u>	Reece Black
<u>WARD:</u>	Halewood South	<u>PARISH:</u>	Halewood Town Council
<u>LOCATION:</u>	5 Halewood Park, Lower Road, Halewood		
<u>PROPOSAL:</u>	INSTALLATION OF ROOF MOUNTED SOLAR PHOTOVOLATICS (PV) TO EXISTING ROOF		

Site Description

The application site is located at 5 Halewood Park, Lower Road, Halewood and is located within an area which is designated as Green Belt in the Development Plan. The application property is a mobile home situated within a larger residential mobile home park, accessed from Lower Road.

The property is detached, stand-alone and located to the western part of the site. The property is clad on its elevations with white UPVC openings and interlocking, tiled roofing. Other mobile homes occupy the site to the north, east and south of the property. The front elevation of the property is south / south-western facing.

Proposal

The application seeks permission for the installation of roof mounted solar photovoltaics (PV) to existing roof.

These would comprise of 8 panels and cumulatively would have a width of 9.11m and a depth of 1.72m and be installed to the front roof slope of the property. The proposed panels would project 0.04m from the slope of the roof.

The installation or alteration etc of solar equipment on domestic premises are covered within Schedule 2, Part 14, Class A (within full accordance of the parameters of the legislation) under 'Permitted Development', however, these are limited to a dwellinghouse or a block of flats; or a building situated within the curtilage of a dwellinghouse or a block of flats. Consequently, Permitted Development Rights do not extend to mobile homes, caravans etc and therefore, an application for full planning permission is required.

Consultations

None Required.

Representations

This application has been publicised by letters sent to 5 neighbours.

Delegated Planning Report

There have been 0 letters of objection, 1 letters of support and 0 letters of comment. The representations are summarised as follows:-

4 Halewood Park – no objection whatsoever.

Planning History

No recorded planning history.

Relevant Policy

Paragraph 11 of the National Planning Policy Framework (NPPF) states that planning decisions should apply a presumption in favour of sustainable development. This means approving development proposals that accord with an up-to-date development plan without delay; or where the development plan is absent, silent or out of date planning permission should be granted unless the application of policies in the NPPF that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole.

Paragraph 12 of the NPPF clarifies that the presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision making. Where a planning application conflicts with an up-to-date development plan, permission should not normally be granted. Local planning authorities may take decisions that depart from an up-to-date development plan, but only if material considerations in a particular case indicate that the plan should not be followed.

The development plan in Knowsley comprises the Saved Policies of the Replacement Unitary Development Plan, the Core Strategy Local Plan and the Joint Waste Local Plan. The following policies are relevant to the determination of this application.

The site is identified as Green Belt in the adopted Unitary Development Plan. Although, the existing mobile home park is still in operation as such, the alteration to the existing roof structure to a domestic property in a site allocated for residential use is considered acceptable in principle, subject to compliance with local planning policy and guidance.

Regarding the adopted Development Plan policies, the proposed application has regard to policies CS2 and CS19 of the adopted Local Plan Core Strategy (2016) and saved policies H5 and H8 of the Unitary Development Plan (2006), together with the Householder Development SPD (2016).

These policies and guidance require that new development demonstrates a high standard of design, which does not adversely affect the character of the property or street scene; maintains a good standard of amenity for all existing and future occupants; avoiding overlooking and overshadowing, as well as an unacceptable overbearing impact; and that adequate parking and garden space would remain for use by residents of the extended property.

KNOWSLEY LOCAL PLAN: CORE STRATEGY

CS2 - Development Principles

CS19 - Design Quality and Accessibility in New Development

CS23 - Renewable and Low Carbon Infrastructure

**SAVED POLICIES - KNOWSLEY REPLACEMENT UNITARY DEVELOPMENT PLAN
(ADOPTED JUNE 2006)**

H8 - Extensions and Alterations to Residential Properties

G7 - Alteration, Extension or Replacement of Existing Dwellings in the Green Belt

Article 35 Statement

The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

Assessment

Saved Policy H8 in the Replacement Unitary Development Plan states that proposals for extensions to dwellings will be permitted provided that:

- a) The proposals would not (due to their scale and massing) result in a disproportionate addition to the original dwelling
- b) The design and materials used would reflect those used on the original dwelling
- c) The proposal would not adversely affect the amenity or privacy of occupiers of adjacent dwellings
- d) The proposal would not create potential hazards for highway users by obstructing visibility for pedestrians or drivers of motor vehicles; and
- e) Adequate parking and garden space would remain in use by the residents of the extended property

Core Strategy Policy CS23 – Renewable and Low Carbon Infrastructure states that the Council will support proposals that will produce and distribute decentralised, low carbon and renewable energy, provided that they do not cause significant harm (in terms of their number, scale, siting or cumulative impacts) to:

- a) Natural resources, biodiversity, geodiversity, water and air quality and, landscape character;
- b) Aviation and transport safety;
- c) Historical and cultural assets;
- d) Public amenity and living conditions; or
- e) Openness and amenity of the Green Belt, except in very special circumstances

Criterion 2 of CS23 also states that proposals must be accompanied by information that shows how the local environment will be protected, and how the site will be restored when energy production ends. Proposals resulting in an unacceptable impact must be mitigated by appropriate measures agreed by the Council.

Saved Policy G7 in the Replacement Unitary Development Plan states that proposal for the

extension or alteration of an existing dwelling within the Green Belt, will be permitted provided that they meet the following (relevant) criteria:

- a) The form and materials of the development would respect the appearance of the existing dwelling and its setting, and preserve the openness of the Green Belt;

The National Planning Policy Framework (Paragraph 167) states that Local Planning Authorities should also give significant weight to the need to support energy efficiency and low carbon heating improvements to existing buildings, both domestic and non-domestic (including through installation of heat pumps and solar panels where these do not already benefit from permitted development rights).

Paragraph 168 also states that when determining applications for all forms of renewable and low carbon energy developments and their associated infrastructure, Local Planning Authorities should:

- a) Not require applicants to demonstrate the overall need for renewable or low carbon energy, and give significant weight to the benefits associated with renewable and low carbon energy generation and the proposal's contribution to a net zero future;
- b) Recognise that small-scale and community-led projects provide a valuable contribution to cutting greenhouse gas emissions.

Design

The existing property is clad facing, with white UPVC windows and doors, and interlocking, roof tiles.

The proposed development would be installed above the existing roof on a rail system / anodized aluminium alloy frame and would comprise coated tempered glass (black).

Applications for the installation of solar photovoltaic equipment on domestic properties are a common alteration, as outlined, are usually covered by Permitted Development Rights and are not an incongruous alteration to domestic properties. They would not be considered to raise any significant adverse impact on design, given that they contain an acceptable scale and massing.

The proposed development would subsequently display an acceptable design and would comply with CS2, CS19, CS23 and Saved Policy H5, H8 and NPPF Paragraphs 167 and 168.

Residential Amenity

The proposed development would be installed to the front roof plane of the existing roof.

Given that the proposal would be installed to the roof of the property and that the surrounding properties are of single storey nature that the solar panels would not be readily visible from an elevated position to cause any adverse amenity impacts.

The applicant has also confirmed via email that the solar panels would be anti-glare to prevent any severe impacts from glint and glare.

The proposed development would subsequently not be considered to cause any unacceptable impact to residential amenities and would comply with CS2, CS19, CS23 and H5.

Highways

The proposal would not have any impact on existing parking provisions at the property or adversely affect highway safety.

Green Belt

The application site is situated within the Green Belt. Although, the proposal would not, however, have an impact on the openness of the Green Belt and would not be considered 'inappropriate development' as the proposal would see minor alterations to the roof of the existing property and consequently, would be acceptable and it would be the opinion that no harm to the openness of the Green Belt would be caused as a result of the proposal.

Conclusion

The proposal would be acceptable in terms of design, residential amenity and highways. The proposal also complies with the relevant Core Strategy, Replacement UDP policies and guidance in the NPPF and is therefore recommended for approval subject to conditions.

Recommendation

That Planning Permission be granted subject to the following Condition(s):-

- 1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason: In order to comply with the requirements of Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2) The development hereby permitted shall be carried out in accordance with the approved plans and documents listed in Schedule 1.

Reason: For the avoidance of doubt.

- 3) In the event that any solar panel or all solar panels and associated equipment ceases use, becomes redundant or are no longer required for the generation of solar energy, then they shall be removed, and the roof top of the application building be made good within 3 months.

Reason: To comply with criterion 2 of Policy CS23 of the Knowsley Local Plan Core Strategy, adopted January 2016, and the National Planning Policy Framework.
