Description

Lightweight panels to eliminate uneven subfloors and improve insulation.**Suitable for use with laminate and engineered wood flooring (floating floor installation).**

FineFloor 7mm FibreBoard underlay is made from traditional natural wood fibre, offering eco-friendly and stable support for your floor. Not only is the material completely natural and 100% recyclable, but Fibreboard is easy to line up, fit and cut, saving you time during installation.

Keep out the cold

With exceptional insulation properties, the FineFloor range is perfect for use on ultra-cold subfloors. So, in a basement, for example, it'll make your room feel so much cosier and usable.

Quietly does it

FibreBoard has a high-impact sound reduction, deadening any loud noise to make the whole room quieter and more peaceful.
