

Note:
This drawing relates to a retrospective planning application, applied for under ref: 23/02640/FUL to Knowsley Council.

North End Lane is subject to a 30mph speed limit and so applying the standards in Manual for Streets, means that visibility splays of 2.4m x 43m are required (if the SSD bonnet length is included).

North End Lane, however, is single track with a narrow carriageway. It is bounded on both sides by tall hedges. These are characteristics which result in low driving speeds. The actual speeds of vehicles on North End Lane are therefore likely to be significantly lower than 30mph. The maximum achievable visibility splays shown to the north of 2.4m x 32m is commensurate with a design speed of 25mph. Given the characteristics of the road, the visibility splay of 32m is considered to be adequate.

Dog Walking Facility
Land at North End Lane, Halewood
Proposed Access Arrangements
and Visibility Splays
Drawing 1194-SK1
Scale 1:250@A3
Issued 30/11/2023

Visibility Splay
2.4m x 32m

No objects with a height above 0.6m to be located within the visibility splays, denoted by the area shaded purple.

Visibility Splay
2.4m x 43m

Fencing to be set back to
accommodate visibility splay

Existing access point
into dog walking facility

Fencing to be set back to
accommodate visibility splay

Proposed passing place

14.6m
