CRAFT WITH 150MM BRUSHWOOD INSULATION
+ 150MM GAP, & 150MM PERIMETER BRUSH-
WOOD INSULATED BOARD.

STUDWORK
New insulators cut the tanks with
square millipex wool wool to be
cut into 12 plates 14 12.5mm
plus preservatives & down to finish.

These are some of the most common viruses that infect plants and animals. They are often spread by insects, but can also be spread by direct contact between infected and healthy individuals. In some cases, they can be spread by the environment, such as through water or soil.
