

Materials prohibited from use, except where used in accordance with 'Good Practice in the Selection of Construction Materials (March 2011)' or unless required by the Contract:

- a. high alkaline content in the structural elements;
- b. high moisture content in the structural elements;
- c. calcium chloride admixture for use in reinforced concrete;
- d. use of admixtures for concrete. The Control of Admixtures in Concrete Regulations, as amended 2012 for their statutory control or prohibition.
- e. any naturally occurring or made mineral fibres (e.g. asbestos, rock wool or mineral wool) used in the construction of the building.
- f. any products containing calcium referred to in the Statutory Instrument SI 2007/1633, as amended, relating to the use of calcium hydroxide in concrete. Reference should also be made to HSE (CD39) 31 and you may wish to refer to the following documents:
