

CL

Semi Enclosed Bike Shelters

Unit shown is two urbenspec CL10s Bike Shelters
- HD Galvanised Finish - (Shelter/Stand) -
Rail Fix Stands - 20 Bikes

urbanspec CL Providing reliable, cost-effective weather protection for a single row of cycles, the standard urbenspec CL Semi-enclosed Bike Shelter utilises an asymmetric quadrant roof and is manufactured as a single 4100mm module, providing cover for up to 10 cycles with Sheffield-type stands. Custom dimensions can be specified, with additional modules able to be joined in-line or as a compound.

urbanspec CL Semi-Enclosed Bike Shelters are supplied with height-adjustable steel base plates that can be fixed to foundation pads either below or flush with the finished surface, depending on site and finish requirements. Surface fixed Sheffield toast rack cycle stands are supplied as standard with root-fix specification available.

Depending on project requirements, urbenspec CL Semi-Enclosed Cycle Shelters are supplied with height-adjustable steel base plates. These can be fixed with foundation pads that lie either below or finished with the finish surface. Sheffield toast rack cycle stands are supplied surface fixed as standard, with specifications for root fixing also available.

The clear view solid polycarbonate cladding is manufactured with UV protection on both sides providing excellent weathering properties and resistance from vandalism. The polycarbonate roof panels can also be specified to cover the central aisle, helping to increase weather protection.

urbanspec CL Semi-Enclosed Cycle Shelters are supplied with HD galvanised coating as standard, while colour powder coat options can be specified to include coordinated cycle stands. Shelters can also be specified as a secure compound with the addition of steel mesh sliding gates and a range of access control systems.

Locking System

Integral locking system is located within the sliding door frame with a key operated deadlock. Handles are integral to the sliding door frame.
