OFFICIAL

Good afternoon Mark,

In terms of addressing the outstanding information requested in relation to trees, please find below the tree planting numbers:

Around the station building / platforms

116 Trees in this area

- 43 are "Multi Stem Specimen Trees"
- 42 are "Clear Stem Specimens"
- 31 are to be retained (TBC in the Arb Report)

Car park area

46 trees in this area

- 30 are "Clear Stem Specimens"
- 16 are "Multi Stem Specimen Trees"

Rest of the site

70 Trees in this area

- 59 are "Native Trees"
- 11 are to be retained (TBC in the Arb Report)

Total of 232 trees planted / retained across the whole site.

Re the additional tree-related items requested, as the design progresses we will be asking our ecologist to overlay the scheme with the trees. At that point we can then produce the Arboricultural Method Statement which is a pre-commencement condition.

Our suggested way forward re the variety of tree is that we update the LEMP following a meeting with Knowsley's Arboriculturist/Landscape Officer and get their views on a staged solution Arboricultural Impact Assessment.

Hopefully sufficient information has now been provided re trees to progress the application, with the understanding that further specific information will be provided post-approval.

Thanks,

Michael Gradwell

Hi Michael

Following the meeting on Wednesday I was promised a detailed response to my e mail of 29/09 regarding the arboriculture issues. Is this available now. Could you please send it through this afternoon?

Regards

Mark Quinn

OFFICIAL

Good afternoon Mark,

Further to your email below re the extent of trees to be removed as part of the Headbolt Lane application, I can now confirm that we are now no longer proposing to remove trees T2, T3 and T4 as requested by the Council's arboricultutal officer.

Kind regards,

Michael Gradwell

Importance: High

Hi Byron

Further to our meeting yesterday please find attached the plan identifying trees T2, T3 and T4 which as a minimum our arboricultural officers considers could be retained although it may well be that more trees identified for removal could be retained.

If your tree specialist wishes to discuss any aspect of the tree comments you can contact the Council's arboricultural officer, Tom Skipworth on 0151-443-2666.

Once we have clarification on the points raised in addition to the missing information we will have to re-consult the arboricultural officer so I would be grateful for an urgent reply to this so it does not delay the completion of the committee report. A full assessment of the impact on trees cannot be undertaken without this information.

Regards
