Eligibility

Permitted development rights are subject to conditions set by legislation to ensure that only appropriate proposals are eligible. The need to apply to the Local Planning Authority to see if prior approval is required is one such condition.

The questions below will help determine if the proposals are eligible for this permitted development right.

Please specify the type of roof on which the solar photovoltaic equipment is to be installed:

- ☐ Flat
☒ Pitched

Would any part of the solar photovoltaic equipment protrude more than 0.2 metres beyond the plane of the roof slope (when measured from the perpendicular with the external surface of the roof slope)?

- ☐ Yes
☒ No

Would any part of the solar photovoltaic equipment come within 1 metre of the external edge of the roof?

- ☐ Yes
☒ No

Would the total electrical generation capacity of all the solar photovoltaics installed on the building under permitted development rights (previously and in this proposal) exceed 1 megawatt?

- ☐ Yes
☒ No

Would the solar photovoltaic equipment be installed on roof slope which fronts a highway, of a building:

- in a conservation area;
- in an area of outstanding natural beauty;
- in an area specified by the Secretary of State for the purposes of enhancement and protection of the natural beauty and amenity of the countryside;
- in the Broads;
- in a National Park;
- in a World Heritage Site

Or, be installed on any part of the roof of a building that is:

- a scheduled monument (or the site contains one)
- a listed building (or within the curtilage of a listed building)

☐ Yes

☒ No

Description of Proposed Works

Please describe the proposed development:

The solar PV system will be under 1MW in size and will be installed on the rooftops at the above mentioned site. The installation will be installed via a pitched roof clamp system on the rooftops.

The impact of glare from the solar modules is considered to be minimal as the solar modules are treated with anti- reflective coating to aid the absorption of light to increase cell efficiency. The modules will also be sited on a shallow pitched roof and will therefore not adversely affect the surrounding area.

The design has been produced so that the modules are sited at least 1.0m from all external edges of the rooftop.

Please refer to the attached indicative rooftop designs.

Declaration

I / We hereby apply for Prior Approval: Roof mounted solar PV on non-domestic building as described in this form and accompanying plans/drawings and additional information. I / We confirm that, to the best of my/our knowledge, any facts stated are true and accurate and any opinions given are the genuine options of the persons giving them. I / We also accept that: Once submitted, this information will be transmitted to the Local Planning Authority and, once validated by them, be made available as part of a public register and on the authority's website; our system will automatically generate and send you emails in regard to the submission of this application.

☒ I / We agree to the outlined declaration

Signed

Sandy Bolt
