HAZARDOUS SUBSTANCES CONSENT ASSESSMENT

WSP have reviewed the plans for the development of the wax kitchen at Jaguar Land Rover (JLR) Halewood site with regards to the applicability of *The Planning (Hazardous Substances) Regulations 2015* and *The Planning (Hazardous Substances) Act 1990*.

The following materials are anticipated to be stored (temporarily or routinely) and the relevant Material Safety Data Sheets (MSDS) have been reviewed. This review has determined whether they should be classified and treated as Hazardous Substances in line with the definitions in Schedule 1 of the Regulations.

Table 1: Material Classification Assessment

Substance	Hazardous Substance (Y/N)	Schedule 1 Category
Pfinder AP13/18	No	N/A
Teroson RB 8275 JA	No	N/A
FT2478361300 CathoGuard 800 RE	No	N/A
Teroson PV 1979 JFS	No	N/A
Teroson PV 1984	No	N/A
Bonderite M-AD 339L (Parco)	No	N/A

The classification of the materials has been undertaken by the vendor of those products. The MSDS provided by the vendor is assumed to be technically correct and compliant with all relevant regulations including UK REACH and CLP.

The review has determined that there are no 'Hazardous Substances' as defined in Schedule 1 of the regulations which are proposed to be present in the new wax kitchen. While the consideration of the requirement for Hazardous Substances Consent must be considered at the site level, as none of the materials are Hazardous Substances, the development of the wax kitchen will not require an application for a Hazardous Substances Consent.
