This forecast has been produced using Fusion21's bespoke target forecasting model. This uses building prices per M² by planning class sourced from Spon's Architects and Builders Price Book to forecast the labour requirements of the development. The target number of weeks (termed 'Employment and Skills' or 'Social Value' weeks) is driven by regional historical information, CSN data from CITB and LMI data indicating future skills gaps.

All data is updated annually to reflect any fluctuations in building price and industry predictions.
